

Forensic Science Policy & Management Welcomes Manuscript Submissions

Editors-in-Chief:

Max M. Houck, Analytic Services, Inc. (ANSER), Arlington, VA and

Jay A. Siegel, Director, Forensic and Investigative Sciences Program; Chair, Department of Chemistry and Chemical Biology, Indiana University and Purdue University

Print ISSN: 1940-9044 • Online ISSN: 1940-9036

Forensic Science Policy & Management: An International Journal is dedicated to improving the effectiveness, efficiency, quality, and operations of forensic science laboratories as well as to the education and training of forensic scientists. In addition, the journal explores the government and institutional policies that affect the practice and management of forensic science.

Articles in the journal will focus on the business of forensic science laboratories, including but not limited to

- Best practices in forensic science and management
- Policy critiques and recommendations
- Education and training of scientists and other laboratory staff
- The economics of forensic science practice
- Quality control/quality assurance
- Staffing and other human resource issues
- Process and efficiency improvements
- Budgeting and other management issues facing laboratory supervisors
- Ethical issues
- The intersection of law and forensic science

Original research articles, case reviews, editorials/commentary, book reviews, and letters to the editors are included in each issue.

Forensic Science Policy & Management: An International Journal does not focus on the science of forensic science, but rather on how scientists, managers, and policy makers practice and use that science. The journal provides a vital forum for exploring both current practice in forensic science and methods for improving and advancing the field so that it can meet rapidly increasing public needs and expectations.
