### **This Week's Forensic Metric: 119**

The median number of cases completed for each full-time equivalent (FTE) employee in the investigative area of Firearms and Ballistics for one full year. This metric gives an indication of the level of productivity within the average laboratory by investigative area. This information is derived from those laboratories who participated in the 2011-2012 FORESIGHT program.

### **SOFT Survey**

The Society of Forensic Toxicologists (SOFT) Drug Facilitated Sexual Assault (DFSA) Committee is gathering data from laboratories that perform analyses on DFSA cases. This survey (<http://www.surveymonkey.com/s/YD5H2GQ>) is designed to determine the most frequently encountered drugs utilized in suspected DFSA cases. By defining these drugs, the committee's intent is to utilize this information to direct research and define any demographic trends in drug use that may exist.
