President's Message

Dear Colleagues:

SAVE-THE-DATE Announcement from NIST

NIST is excited to share with us the announcement of the International Symposium on Forensic Science Error Management – Detection, Measurement and Mitigation. The international symposium will be convened on July 20-24, 2015 at the Washington Hilton Hotel in Washington, DC.

http://www.nist.gov/forensics/news-save-date-symposium.cfm

They are planning the program and local arrangements for the meeting with a number of international forensic science agency partners and Federal government agency partners. Information about a meeting website will be sent as soon as there are more details about registration and submitting abstracts for platform presentations, posters and panel discussions. Look for more information soon!

Have a good week,

Brady Mills
ASCLD President

After several years of persistent, dedicated work by the ASCLD membership, I'm very excited to present the final report for the Forensic Provider Survey. As you may recall, this project was begun in 2010 with the goal of determining the number of forensic science providers in the United States. Although we were able to obtain information from most states, there are still some areas of the country that require some follow up. Nonetheless, this report provides a very good estimate as to the number of current forensic science providers and can be used as a road map for any future work in regards to this topic.

I would like to specifically acknowledge Beth Kroupa and John Collins as primary contributors to this effort. I also would like to thank the staff at RTI for their excellent editing and scheduling persistence. Finally, I would like to recognize all of those who served as state coordinators and volunteered their time to assist with the completion of this project.

Jay Henry,
ASCLD Past President
**Advocacy Corner**

As I mentioned last week, a critical advocacy issue right now is the re-authorization and appropriation of Coverdell funding. Unless Coverdell is re-authorized, it will disappear and cannot have funding appropriated to it each year. Additionally, unless the House recedes to the Senate appropriation of $12 million, some agreement from $0 to $12 must be struck in conference and there’s no guarantee of funding at all for FY 2015.

Attached are 3 documents that are very important. First, is a document with instructions on how to contact your Senators and Representatives and what to ask for. The second is a list of talking points to help you discuss the issues with the staffers that you call. Lastly, a general letter has been provided for you to address to your Congressional delegation and request appropriation and re-authorization.

Please take time today to look over these documents and contact your representatives to request re-authorization and appropriation of Coverdell.

Have a great week.

-Jeremy Triplett

REGISTRATION IS NOW OPEN: Bode’s 2014 DNA Technical Conferences, providing DNA training on the latest techniques and technologies to the forensic scientific community.
Advanced Topics for Human Identification & Data Interpretation
December 2-5, 2015 | Philadelphia, PA

This 4 day course will offer training for forensic biologists and technicians involved in testing and testimony for forensic human identification. Each day will focus on issues of current interest in the field and conclude with an open dialogue panel discussion. Topics Include: Current issues with variability in the interpretation of complex mixtures, designing internal validation studies and interpretation guidelines, alternate approaches to mixture interpretation for challenging samples, evaluation of statistical models for mixed sample sources, and the use of novel techniques.

Distinguished faculty include: John Butler, PhD, Niels Morling, MD, DMSc, Michael Coble, PhD, Charles Brenner, PhD, Charlotte Word, PhD, and other forensic biology professionals.

It's all because of a massive backlog of cases at the state's only full service forensic lab at the West Virginia State Police Headquarters in South.

Bode Technology provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode's solutions include BodeDirect™ Outsourcing and Same-Day DNA Service™, and the Bode Buccal DNA Collector™, a direct collection system, reduces processing time, saving money for crime laboratories.

Bode's newest offerings include:
BodeLIMS™ – The First True Forensic DNA LIMS. BodeLIMS is a web-based LIMS that tracks samples from receipt through reporting. The software documents and captures the entire DNA analysis process and is completely configurable, thus adaptable to changing technologies.

Bode LeanLab™ service utilizes Lean Six Sigma principles and delivers custom solutions to forensic labs improving efficiency, increasing throughput, reducing turnaround time and eliminating backlogs. Visit www.bodetech.com or email bode.service@bodetech.com for more information.

GC/MS/MS Speed, Sensitivity, and Selectivity Beyond Comparison
Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu’s GCMS-TQ8030,

Forensic Magazine® is the leading source of information on all aspects of forensic science technology, trends, equipment,
providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications.

Key features include:
• MRM and simultaneous Scan/MRM acquisition modes
• Ultrafast 600 MRM transitions/sec
• True scan speed of 20,000 u/sec
• Fully optimized collision energy for each MRM transition
• Single software platform for all Shimadzu GCMS
• Front-access source for easy maintenance

Learn more. Visit http://www.ssi.shimadzu.com/ASCLD

**Forensic Training**

For many years RTI International, which hosts NIJ’s Forensic Science Technology Center of Excellence, has offered a number of live and on-demand training courses free of charge. On October 1, 2014 RTI will begin charging nominal course registration fees for content. Once registered, you will have a 90-day period to access as much on-demand content for that course as you desire and revisit the training as often as you like.

To view a list of affected course, visit the All Courses webpage and search for “RTI services, and laboratory design. In every issue, Forensic Magazine® provides professionals working in forensic laboratories and crime scene investigation with the news and technical information they need—both in the lab and in the field. Forensic Magazine® covers forensics from evidence collection through processing, analysis, storage, and more. Forensic Magazine® features the latest technology, applications, and information for forensic scientists, crime scene investigators, and forensic specialists. Free subscriptions for the print/digital magazine and daily electronic newsletter are available at www.forensicmag.com

As the innovative market and technology leader, QIAGEN creates sample and assay technologies that enable access to content from any biological sample.

Our mission is to enable our customers to achieve outstanding success and breakthroughs in life sciences, applied testing, pharma, and molecular diagnostics. We thereby make improvements in life possible.

Our commitment to the markets, customers, and patients we serve drives our innovation and

Touch DNA in Sexual Assault Cases: Practical Considerations and Unanswered Questions
Date: September 30, 2014 Time: 12:00 pm—1:30 pm

George Mason University’s Office of Continuing Professional Education in Virginia is hosting a 2-day seminar:
Sexually Violent Crime: The Body as Evidence
Taught by Dr. Henry Lee and Dr. Leah Bush
November 3-4, 2014

Sexually violent crime continues to challenge investigators and concern the general public. It has been estimated that every two minutes, someone in the United States is sexually assaulted. In many cases, sexual assault results in homicide. Dr. Henry Lee and Dr. Leah Bush, two of the country's top forensic scientists, will share their individual and collective expertise to help the participants understand the importance of the body as evidence as it relates to sexually violent crimes.

Accreditation Training

ASCLD-LAB Training
Training classes to help forensic laboratory personnel understand the requirements of ISO/IEC 17025 General Requirements for the Competency of Testing and Calibration Laboratories.

American Association for Laboratory Accreditation (A2LA)
A2LA’s Training Program provides a variety of courses designed to help organizations achieve and maintain accreditation to international standards

ANSI-ASQ National Accreditation Board/FQS
FQS is a member of the ANSI-ASQ National Accreditation Board family of brands. FQS provides accreditation for ISO/IEC 17025 forensic test laboratories and ISO/IEC 17020 forensic inspection agencies and a wide variety of training, workshops, and academic programs.
Please visit our course page at http://www.ocpe.gmu.edu/programs/legal/cold_case.php for more information on this exciting opportunity to learn from two of the top forensic scientists in the country!

Forensics@NIST 2014 to take place Dec. 3-4 in Gaithersburg, Md.

The Center for Advanced Forensic DNA Analysis (CAFDA) would like to thank all the attendees that came to their Genome ID Forum 2014 - Emerging Forensic Genomic Applications held on September 9 and 10, 2014 in Greenville, North Carolina. Thought leaders from forensic science, research, academia, law enforcement, legal and technology development came together for an open dialogue regarding emerging science and technology applications and adoption through the forensic community. Over 65 forensic scientists, lawyers and researchers across the United States and England attended to discuss the implementation of new technologies and scientific applications in forensic human identification, new challenges in adoption, compliance and acceptance in a court of law. The presentations focused on research on emerging science and technology and the effect these emerging science and technology applications may have on forensic science practitioners. The program included thoughtful roundtable discussions that provided a meaningful exchange of ideas related to the direction of the forensic community concerning emerging technologies. The Center for Advanced Forensic DNA Analysis™ plans for the 2015 Genome ID Forum have already begun.
Cal State Fullerton Certificates in Crime & Forensics.

Computer Forensics I is a hybrid program with a combination of traditional face-to-face and online courses. The program includes hands-on experience using EnCase, the industry standard in computer forensic investigation technology, and Forensic Toolkit (FTK), a suite of technologies used to perform forensic examinations of computer systems.

**Forensic Conferences**

October 6-8, 2014: 3rd International Conference on Forensic Research and Technology in San Antonio, TX.

October 19-23, 2014: 36th Annual Southwestern Association of Forensic Scientists (SWAFS) in South Padre Island, TX.

November 3-6, 2014: Annual DNA & Investigators Workshop-- Bode Mid-Atlantic in Crystal City, VA

November 3-6, 2014: Northeastern Association of Forensic Scientist (NEAFS) Annual Meeting in Hershey, PA.

February 16-21, 2015: AAFS 67th Annual Scientific Meeting in Orlando, FL

May 24-29, 2015: The Association of Firearm and Tool Mark Examiners (AFTE) in Dallas, TX.

July 20-24, 2015: NIST to Host International Symposium on Forensic Science Error Management in Gaithersburg, MD.

August 2-8, 2015: 100th International Association for Identification (IAI) in Sacramento, CA.

August 8-13, 2015: The 2015 Annual General Meeting of the American Society of Questioned
Document Examiners (ASQDE) will be held in Toronto, Canada.
