General Announcements

President’s Message

Dear Colleagues:

Last week, NIST announced the appointment of 17 academic researchers and forensic science experts to the Forensic Science Standards Board (FSSB). I am pleased to say that ASCLD is well represented on the FSSB. NIST has included our board member and advocacy chair Jeremy Triplett, past board member and co-chair of the Forensic Research Committee (FRC) George Herrin, PhD and member Scott Oulton on the FSSB. The complete NIST announcement can be found at the link below.

Have a good week,

Brady Mills
ASCLD President

DNA Mixture Interpretation Study

The ASCLD Forensic Research Committee supports the NIJ-funded DNA Mixture Interpretation Study coordinated by the Defense Forensics and Biometrics Agency and all interested laboratories are encouraged to participate. The purpose of this study is determine the variation that occurs in interpretation of DNA mixtures in 2-, 3-, and 4-person mixtures. Variations in allele calls will be evaluated intra- and inter-laboratory and allele calls will be evaluated both pre- and post-technical review. Participants will analyze five DNA mixture datasets that vary in the number of contributors and contributor ratios. Interpretations will be made using the laboratory’s Standard Operating Procedures but with the thresholds provided based on the

Advocacy Corner

ASCLD has joined the social media world and is now on Twitter! Using Twitter will allow us to better interface with stakeholders, media, legislative offices, and YOU. If you are on Twitter, please follow us. Our name is @ascld_ (with the underscore). We look forward to seeing you in the Twittersphere!

Jeremy Triplett
Advocacy Chair

Vendor Sponsors

The Center for Advanced Forensic DNA Analysis (CAFDA) is pleased to announce the Genome ID Forum 2014 - Emerging Forensic Genomic Applications; a conference to take place on September 9 and 10 at the Hilton Greenville, North Carolina. Genome ID Forum brings together thought leaders from forensic science, research, academia, law and technology development for an open on-going dialogue regarding emerging science, technology applications and adoption by the forensic community. The program includes Dr. Peter M. Vallone, Leader, Applied Genetics Group, National Institute of Standards and Technology (NIST) speaking on “Research on Emerging Applied Technologies conducted at NIST”. To
validation of the instrumentation used to generate the data set. Participants will receive the data in the form of .fsa files. The study will use quantifiable metrics to evaluate the participant’s ability to identify the number of contributors, estimate the ratio of mixture components, evaluate the accuracy of the allele calls in each mixture, and examine the variations in the final statistics generated for the reported interpretations. The study is designed to take no more than 4 hours. Currently, eleven labs are participating.

To sign up, please email Roman Aranda at roman.aranda3.ctr@mail.mil. Please use “DNA Mixture Interpretation Study” in the subject line. Registration closes July 21, 2014 and all results must be returned by August 22, 2014.

GC/MS/MS Speed, Sensitivity, and Selectivity Beyond Comparison
Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu’s GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications.

Key features include:
• MRM and simultaneous Scan/MRM acquisition modes
• Ultrafast 600 MRM transitions/sec
• True scan speed of 20,000 u/sec
• Fully optimized collision energy for each MRM transition
• Single software platform for all Shimadzu GCMS
• Front-access source for easy maintenance

Bode's solutions include BodeDirect™ Outsourcing and Same-Day DNA Service™, and the Bode Buccal DNA Collector™, a direct collection system, reduces processing time, saving money for crime laboratories.

Bode's newest offerings include: BodeLIMS™ – The First True Forensic DNA LIMS. BodeLIMS is a web-based LIMS that tracks samples from receipt through reporting. The software documents and captures the entire DNA analysis process and is completely configurable, thus adaptable to changing technologies.

Bode LeanLab™ service utilizes Lean Six Sigma principles and delivers custom solutions to forensic labs improving efficiency, increasing throughput, reducing turnaround time and eliminating backlogs.

Forensic and Investigative Science Outreach is pleased to provide quality, continuing education courses for forensic professionals. We would like to announce several on-site courses which will be offered for FREE at West Virginia University in Morgantown, West Virginia. Please feel free to visit our website for additional registration information and to share this information with other interested individuals.

**Continuing Education Courses – Summer 2014**

**Paint Evidence and the Forensic Laboratory**

This course will cover how paint evidence can be analyzed in the forensic laboratory. The course will give background on paint, polarizing light microscopy, FTIR, XRF, and Raman. Students will gain hands on experience analyzing paint using microscopy, FTIR, XRF, and Raman and learn how to interpret the results.

Dates: July 8-10, 2014
Instructor: Patrick Buzzini, PhD
Location: Oglebay Hall- Downtown Campus

**Blood Presumptive Testing and Enhancement**

This course will cover the medium of blood, precautions to take for personal protection, packaging concerns, and the importance of controls. It is intended for the beginning crime scene investigator, seasoned investigators wishing to review and practice these techniques, and patrol officers with secondary duties at the crime scene. Following the lecture portion, the remainder of the class will be hands on using techniques such as phenolphthalein, BlueStar, Amido Black, and Acid Yellow 7.

Dates: July 10-11, 2014
Instructor: Kelly Ayers, MS, CSCSA
Location: WVU Crime Scene Complex- Evansdale Campus

**Identification of Natural and Man-made Fibers**

This course will introduce students on how to identify natural and man-made fibers. The course will cover background information on fibers, the difference between natural and man-made fibers, polarizing light microscopy, thermal microscopy, and FTIR.

**Deputy Director of Identification Services**, Department of Emergency Services and Public Protection, Meriden, CT, Expires: July 3, 2014

**Laboratory Accreditation Specialist**, New York State, Albany, NY, Expires: June 30, 2014

**Forensic Scientist**, Fort Worth Police Department, Fort Worth, Texas, Expires: August 30, 2014

**Forensic Scientist**, Houston Forensic Science LGC,INC., Houston, TX, Expires: August 12, 2014

**Lead Forensic Scientist (DNA)**, DC Government/Department of Forensic Sciences, Washington, DC, Expires: July 31, 2014

**Forensic Scientist (Crime Scene)**, DC Government, Washington, DC, Expires: July 17, 2014

**Forensic Scientist 3**, Metro Nashville Police Department- Crime Laboratory, Nashville, TN, Expires: July 14, 2014

**Forensic Scientist 2- Drug Unit**, Metro Nashville Police Department- Crime Laboratory Division, Nashville, TN, Expires: July 14, 2014
Students will then gain hands on experience looking at both natural and man-made fibers under the microscopy and analyzing them using thermal microscopy and FTIR. Students will also be introduced to the notions on evidence interpretation as well as the Bayesian approach.

Dates: July 15-17, 2014
Instructor: Patrick Buzzini, PhD
Location: Oglebay Hall- Downtown Campus

Forensic GC/MS Workshop

Attendees will develop the ability to understand, carry out, and interpret mass spectrometric analyses in a crime laboratory setting. Attendees will also learn how to maintain and troubleshoot common problems with instrumentation. This course is geared toward those with solid scientific or technical background.

Dates: July 15-17, 2014
Instructor: Patrick Buzzini, PhD
Location: Oglebay Hall- Downtown Campus

Characterization and Comparison of Dyed Fibers

This course will introduce students to the forensic examination of dyed fiber evidence. The course will cover background information on dyed fibers, polarizing light microscopy, comparison microscopy, dichorism, Raman spectroscopy, Microspectrophotometry and Thin Layer Chromatography (TLC). Students will then gain hands on experience looking at dyed fibers under the microscope and analyzing them using, Raman spectroscopy, Microspectrophotometry, and Thin Layer Chromatography. Students will also be introduced to the notions on evidence interpretation as well as the Bayesian approach.

Dates: July 22-24, 2014
Instructor: Patrick Buzzini, PhD
Location: Oglebay Hall- Downtown Campus

Introduction to Firearm Examination

This training course will cover the basic duties and necessary knowledge for firearm examiners. Hands-on examination of firearm components along with microscopic comparisons and firearm classification will be discussed and demonstrated. This course will give
students a basic understanding of firearm examination techniques and as well as a list of reliable resources to use in a laboratory setting. Crime scene investigators, evidence technicians and novice firearm examiners who wish to enhance the student’s understanding of firearm examinations are encouraged to register for this course. Dates: July 28-30, 2014 Instructor: Keith Morris, PhD Location: Oglebay Hall- Downtown Campus

**ASCLD Webinars:**
Links to these webinars can also be found on the ASCLD Training Opportunities webpage.

**Webinar #1:** Taking the First Steps Toward Backlog Reduction

**Webinar #2:** The Backlog Paradox: Doing Less is Doing More

**Webinar #3:** Managing Customer Expectations and Education

**Webinar #4:** Case Acceptance, Policies and Guidelines

**Webinar #5:** Efficiency Improvements

**Webinar #6:** Increasing Your Staff without Increasing Your Budget

**Webinar #7:** Developing a Statewide Approach to Backlog Management

**ASCLD-LAB Training** Training classes to help forensic laboratory personnel understand the requirements of ISO/IEC 17025 General Requirements for the Competency of Testing and Calibration Laboratories.

**Cal State Fullerton Certificates in Crime & Forensics.** Contact Veronica Martinez at 1-657-278-3123 or see http://extension.fullerton.edu/professionaldevelopment/Crime-Forensic.

**RTI International’s Center for Forensic Sciences Continuing Education** is pleased to offer a second premium online course for legal professionals, titled “Managing Quality and Reliability in the Crime Laboratory: A Lawyer’s Perspective”. This low cost training was developed with the support of ASCLD/LAB, the North
Carolina District Attorney’s Association and the National Association of Prosecutor Coordinators. This course is designed for legal professionals who interface with scientific experts and/or present scientific evidence in courts of law. The course provides information about how accredited crime laboratories control quality, ensure the reliability of results, and work to maintain a high level of customer satisfaction and confidence in the reliability of laboratory services. It is recommended, but not required, that users have taken the course; An Introduction to the Crime Laboratory - Understanding its Role and Purpose before attempting this course.

By the end of this course, you should be able to:

• Evaluate the work of a scientific expert
• Name the two types of scientific analyses
• Name the international body that governs crime laboratory accreditation
• Recognize authoritative documents and court rulings critical to forensic science
• List five warning signs signaling problems in a crime laboratory

If you know of a legal professional who may be interested in taking this course, please direct them to: https://www.forensiced.org/training/viewcourse.cfm?moduleid=fd2f9c6-4d9e-4e7c-a6fd-c5301474a49d. In some states, this course has been approved for 1 hour of CLE and MCLE credits (https://www.forensiced.org/training/clestates.cfm?cid=1128152721).

The ANSI-ASQ National Accreditation Board/FQS offers 2 workshops for accreditation preparation to the forensic community.

**ISO/IEC 17025 and Audit Preparation Workshop for Forensic Test Agencies**

Attendees of this three-day workshop will obtain a general overview of ISO/IEC 17025 as it relates to forensic test agencies. All of the elements will be reviewed. The standard’s applicability, origin, purpose and marketplace will be discussed. Some of the more important concepts will be reviewed such as document control, internal auditing, proficiency testing, traceability and measurement and method witnessing.

*September 22-24, 2014, Alexandria, VA*

**ISO/IEC 17020 and Audit Preparation Workshop for Forensic Police Agencies**

Attendees of this two-day workshop will obtain a general overview of ISO/IEC 17020 for forensic police
Individual elements of the standard will be reviewed; the standard’s applicability to forensic police agencies, origin, purpose and marketplace will also be discussed. Some of the more important concepts, such as document control, internal auditing, proficiency testing, traceability and measurement, and method witnessing will be reviewed.

**September 25-26, 2014, Alexandria, VA**

For more information about these workshops, contact FQS at 703-836-0025, ext 208. To register, please click on any of the dates above.

---

**Conferences**

August 11-15, 2014: The **2014 Annual General Meeting** of the American Society of Questioned Document Examiners (ASQDE) will be held in Honolulu, Hawaii. The meeting will be a joint meeting with the Australasian Society of Forensic Document Examiners, Inc.

September 9-10, 2014: Emerging Forensic Genomic Applications – genomeID forum

September 23-26, 2014: **Southern Association Forensic Scientist (SAFS) Annual 2014 Meeting** in Savannah, GA.

October 19-23, 2014: 36th Annual Southwestern Association of Forensic Scientists (SWAFS) in South Padre Island, TX.

November 3-6, 2014: Annual DNA & Investigators Workshop—Bode Mid-Atlantic in Crystal City, VA

November 3-6, 2014: Northeastern Association of Forensic Scientist (NEAFS) Annual Meeting in Hershey, PA.

February 16-21, 2015: AAFS 67th Annual Scientific Meeting in Orlando, FL
