President’s Message

Dear Colleagues:

The ASCLD board is excited to announce that we have partnered with Kinsley Meetings to assist with the planning and supervision of our 2015 meeting in Washington, D.C. Kinsley will work with our Vendor and Sponsorship Committee to attract more support. This will in turn help to cover the cost of having a meeting planner. They will also work with us to set up our online registration to make the process smoother, both during registration and at the meeting. Kinsley has worked with several vendors for exhibit setup and AV needs and may be able to provide discounts on our contracts. Several members of the ASCLD Board met with representatives from Kinsley while at our Scottsdale meeting. Kinsley also had a representative stay for a few days during the meeting to learn more about how our meetings run and to assess areas that we can renovate and rejuvenate so our meetings can be even more successful. Any of you that have worked on planning and putting on a large meeting know how much work is involved. Having professionals assist us will give us the ability to utilize their expertise and focus the Board on being more actively interacting with the membership during the meeting, instead of behind the scenes.

Due to an oversight on the part of ASCLD, one additional new member, Daniel Bradshaw, Technical Lieutenant, New York State Police Forensic Investigation Center, has been added to the list of new Regular Members. This list is posted on the ASCLD website. Please let me know if you have any questions.

Brady Mills
ASCLD President

DNA Mixture Interpretation Study

Vendor Sponsors

The Center for Advanced Forensic DNA Analysis (CAFDA) is pleased to announce the Genome ID Forum 2014 - Emerging Forensic Genomic Applications; a conference to take place on September 9 and 10 at the Hilton Greenville, North Carolina. Genome ID Forum brings together thought leaders from forensic science, research, academia, law and technology development for an open on-going dialogue regarding emerging science, technology applications and adoption by the forensic community. The program includes Mr. John Byrd, Director, North Carolina State Crime Laboratory speaking on “Challenges to Implementation of New and Advanced Technologies in a Forensic Laboratory”. To foster open discussions, space is limited. Registration is available through our website at www.genomelDforum.com.

GC/MS/MS Speed, Sensitivity, and Selectivity Beyond Comparison

Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu’s GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background

GC/MS/MS Speed, Sensitivity, and Selectivity Beyond Comparison

Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu’s GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background
The ASCLD Forensic Research Committee supports the NIJ-funded DNA Mixture Interpretation Study coordinated by the Defense Forensics and Biometrics Agency and all interested laboratories are encouraged to participate. The purpose of this study is determine the variation that occurs in interpretation of DNA mixtures in 2-, 3-, and 4-person mixtures. Variations in allele calls will be evaluated intra- and inter-laboratory and allele calls will be evaluated both pre- and post-technical review. Participants will analyze five DNA mixture datasets that vary in the number of contributors and contributor ratios. Interpretations will be made using the laboratory’s Standard Operating Procedures but with the thresholds provided based on the validation of the instrumentation used to generate the data set. Participants will receive the data in the form of .fsa files. The study will use quantifiable metrics to evaluate the participant’s ability to identify the number of contributors, estimate the ratio of mixture components, evaluate the accuracy of the allele calls in each mixture, and examine the variations in the final statistics generated for the reported interpretations. The study is designed to take no more than 4 hours. Currently, eleven labs are participating.

To sign up, please email Roman Aranda at roman.aranda3.ctr@mail.mil. Please use “DNA Mixture Interpretation Study” in the subject line. Registration closes August 29, 2014 with all data to be returned to Dr. Aranda by September 29, 2014.

REGISTRATION IS NOW OPEN: Bode’s 2014 DNA Technical Conferences, providing DNA training on the latest techniques and technologies to the forensic scientific community.

Bode Technology provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode’s solutions include BodeDirect™ Outsourcing and Same-Day DNA Service™, and the Bode Buccal DNA Collector™, a direct collection system, reduces processing time, saving money for crime laboratories.

Bode’s newest offerings include: BodeLIMS™ – The First True Forensic DNA LIMS. BodeLIMS is a web-based LIMS that tracks samples from receipt through reporting. The software documents and captures the entire DNA analysis process and is completely configurable, thus adaptable to changing technologies.

Bode LeanLab™ service utilizes Lean Six Sigma principles and delivers custom solutions

Registration is now open for the 2014 Forensic Management Academy, a unique one-week management program geared specifically to current and aspiring forensic laboratory managers, law enforcement professionals and other forensic service providers. Instructors include forensic practitioners and college professors experienced in the field of forensics. The program will be offered September 14 – 19, 2014 in Morgantown, WV on the WVU campus. Please visit our website at http://www.be.wvu.edu/execed/fma for more information and to register.

Forensic Magazine® is the leading source of information on all aspects of forensic science technology, trends, equipment, services, and laboratory design. In every issue, Forensic Magazine® provides professionals working in forensic laboratories and crime scene investigation with the news and technical information they need—both in the lab and in the field. Forensic Magazine® covers forensics from evidence collection through processing, analysis, storage, and more. Forensic Magazine® features the latest technology, applications, and information for forensic scientists, crime scene investigators, and forensic specialists. Free subscriptions for the print/digital magazine and daily electronic newsletter are available at www.forensicmag.com

Training

A2LA courses are designed with forensic professionals in mind, including a new courses to be hosted in Minnesota this September on ISO/IEC 17025 and 17020. See the below link for a full listing with dates and topics.

Crime Scene Specialist, Scottsdale Police Department, Scottsdale, AZ, Expires: August 31, 2014

Forensic Management Analyst, Harris County Institute of Forensic Sciences, Houston, Texas, Expires: November 14, 2014

Forensic Scientist I (Chemical), Suffolk County Crime Laboratory, Hauppauge, NY, Expires: November 14, 2014

Criminalist, Sacramento County DA’s Office Laboratory of Forensic Services, Sacramento, CA, Expires: August 29, 2014

Criminal Investigator I – Chemist, Colorado Bureau of Investigation, Pueblo, CO, Expires: August 28, 2014

Forensic Chemist I, Kentucky State Police Central Forensic Laboratory, Frankfort, KY, Expires: August 17, 2014

Forensic Science Technician, Charles County Sheriff, La Plata, Expires: September 8, 2014

Forensic Scientist- Chemist, Beaufort County Sheriff’s Office, Beaufort, South Carolina, Expires: September 1, 2014

Forensic DNA Analyst, Beaufort County Sheriff’s Office, Beaufort, South Carolina, Expires: September 1, 2014

Latent Print Examiner, Fort Worth Police Dept, Fort Worth, Texas, Expires: August 27, 2014
The ANSI-ASQ National Accreditation Board/FQS offers 2 workshops for accreditation preparation to the forensic community.

- **ISO/IEC 17025 and Audit Preparation Workshop for Forensic Test Agencies**
  
  Attendees of this three-day workshop will obtain a general overview of ISO/IEC 17025 as it relates to forensic test agencies.

  September 22-24, 2014, Alexandria, VA

- **ISO/IEC 17020 and Audit Preparation Workshop for Forensic Police Agencies**
  
  Attendees of this two-day workshop will obtain a general overview of ISO/IEC 17020 for forensic police agencies.

  September 25-26, 2014, Alexandria, VA

For more information about these workshops, contact FQS at 703-836-0025, ext 208. To register, please click on any of the dates above.

**ASCLD-LAB Training**

Training classes to help forensic laboratory personnel understand the requirements of *ISO/IEC 17025 General Requirements for the Competency of Testing and Calibration Laboratories.*

George Mason University's Office of Continuing Professional Education in Virginia is hosting a 2-day seminar:

Sexually Violent Crime: The Body as Evidence
Taught by Dr. Henry Lee and Dr. Leah Bush
November 3-4, 2014

Sexually violent crime continues to challenge investigators and concern the general public. It has been estimated that every two minutes, someone in the United States is sexually assaulted. In many
cases, sexual assault results in homicide. Dr. Henry Lee and Dr. Leah Bush, two of the country's top forensic scientists, will share their individual and collective expertise to help the participants understand the importance of the body as evidence as it relates to sexually violent crimes.

Please visit our course page at http://www.ocpe.gmu.edu/programs/legal/cold_case.php for more information on this exciting opportunity to learn from two of the top forensic scientists in the country!

Forensic and Investigative Science Outreach is pleased to provide quality, continuing education courses for forensic professionals. We would like to announce several on-site courses which will be offered for FREE at West Virginia University in Morgantown, West Virginia. Please feel free to visit our website for additional registration information and to share this information with other interested individuals.

RTI International’s Center for Forensic Sciences Continuing Education is pleased to offer a second premium online course for legal professionals, titled “Managing Quality and Reliability in the Crime Laboratory: A Lawyer’s Perspective”. This low cost training was developed with the support of ASCLD/LAB, the North Carolina District Attorney’s Association and the National Association of Prosecutor Coordinators. This course is designed for legal professionals who interface with scientific experts and/or present scientific evidence in courts of law. The course provides information about how accredited crime laboratories control quality, ensure the reliability of results, and work to maintain a high level of customer satisfaction and confidence in the reliability of laboratory services. It is recommended, but not required, that users have taken the course; An Introduction to the Crime Laboratory - Understanding its Role and Purpose before attempting this course.

By the end of this course, you should be able to:

- Evaluate the work of a scientific expert
- Name the two types of scientific analyses
- Name the international body that governs crime laboratory accreditation
- Recognize authoritative documents and court rulings critical to forensic science
- List five warning signs signaling problems in a crime laboratory

If you know of a legal professional who may be interested in taking this course, please direct them to: [http://www.forensiced.org/training/viewcourse.cfm?moduleid=fd2f9c6-4d9e-4e7c-a6fd-c5301474a49d](http://www.forensiced.org/training/viewcourse.cfm?moduleid=fd2f9c6-4d9e-4e7c-a6fd-c5301474a49d). In some states, this course has been approved for 1 hour of CLE and MCLE credits ([https://www.forensiced.org/training/clestates.cfm?cid=1128152721](https://www.forensiced.org/training/clestates.cfm?cid=1128152721)).
