

American Society of Crime Lab Directors

"THE CRIME LAB MINUTE" NEWSLETTER

President's Message

ASCLD Leadership Academy

Request for Instructors

The American Society of Crime Laboratory Directors (ASCLD) is now accepting applications from members interested in serving as instructors for the upcoming ASCLD Leadership Academy in 2015.

After a resounding success in 2014, the 2nd ASCLD Leadership Academy will be held in early 2015. The Academy will again target new supervisors in the forensic science field or supervisors who have previously had limited opportunity for structured forensic management education and training.

Academy instruction will be delivered via webinar-style online sessions during the months of February, March, and April and will conclude with live, instructor-led training at the 2015 ASCLD Symposium in Washington, DC. Each month of web-based instruction will be centered on a topical theme and will include 4, weekly 2-hour sessions. The in-person "Capstone" sessions in Washington will incorporate the key learning themes from each monthly topic. A link to the 2015 request for instructors information packet and application is located below.

Have a good week,

Brady Mills

ASCLD President

Advocacy Corner: NCFSS Reopens Public Comment Period

Based on feedback from the forensic science community, the National Commission on Forensic Science has re-opened the public comment period for the six recently published draft work products. These draft documents include the following:

[Views Document on Defining Forensic Science and Forensic Science Service Providers](#)

[View Document on Scientific Literature and Support of Forensic Science and Practice](#)

[Policy Recommendation on Discovery](#)

[Policy Recommendation on Expert Testimony](#)

[Policy Recommendation on Universal Accreditation](#)

[Policy Recommendation on Accreditation of Medicolegal Death Investigation Offices and Certification of Medicolegal Death Investigation Personnel](#)

Thank you so much to those who have already taken the opportunity to comment and provide input from our community on these documents. So far, the documents have garnered more than 130 public comments from a wide variety of stakeholder perspectives. If you haven't yet, I would encourage you to read the documents and provide feedback – in the form of both positive and constructive criticism. In attending the meetings of the NCFS, I get the strong impression that many of the Commissioners actively want feedback from the community in all forms. We have a responsibility to be active partners in this process and I know that our Commissioners from the forensic science community would appreciate the support as well.

To provide comments on the draft work products, please visit:
<http://www.regulations.gov/#!docketDetail;D=DOJ-LA-2014-0006>

Have a GREAT week.
Jeremy Triplett
ASCLD Advocacy co-chair

Dear ASCLD Member,

I am a Ph.D. student in the School of Criminal Justice at the University at Albany. I have a M.S. degree in forensic biology and for my Ph.D. dissertation, I am conducting research on the impact of court decisions on crime laboratories in the United States. The goal of the study is to better understand both the practical implications of court decisions for crime labs as well as how labs implement court decisions.

If you are a regular or retired ASCLD member from the U.S., I am writing to invite you to participate in an online survey for my dissertation research. The survey is expected to take approximately 10 - 15 minutes to complete. Please click on the link below to go to the survey website (or copy and paste the survey link into your internet browser).

The person who responds to this survey should have an understanding of policy implementation in the laboratory. Ideally, this understanding should come from an administrative, supervisory, or managerial role in the lab.

The survey is completely voluntary and strictly anonymous. No identifying information will be requested. The survey software will not collect or store your computer's IP address, your email, or any geo-data about your location.

Survey Link: <http://sgiz.mobi/s3/Court-Decisions-and-Crime-Labs>

Your experience and knowledge are instrumental to furthering insight into the impact of court decisions on crime laboratories. Please consider participating in my research study by completing the survey—it would really help me out. I will provide a copy of my completed dissertation to ASCLD, so that the final results of the study are available to you.

If you have any questions about the survey or my research, please feel free to contact me or my dissertation committee chair, Dr. James R. Acker. We can be reached at cbonventre@albany.edu and jacker@albany.edu, respectively.

The original date for completion of the survey was October 15, 2014. However, the date has been extended so the survey is still available through **November 30, 2014.**

Advanced Topics for Human Identification & Data Interpretation

December 2-5, 2015 | Philadelphia, PA

This 4 day course will offer training for forensic biologists and technicians involved in testing and testimony for forensic human identification. Each day will focus on issues of current interest in the field and conclude with an open dialogue panel discussion. Topics Include: Current issues with variability in the interpretation of complex mixtures, designing internal validation studies and interpretation guidelines, alternate approaches to mixture interpretation for challenging samples, evaluation of statistical models for mixed sample sources, and the use of novel techniques.

Distinguished faculty include: John Butler, PhD, Niels Morling, MD, DMSc, Michael Coble, PhD, Charles Brenner, PhD, Charlotte Word, PhD, and other forensic biology professionals.

Forensic Magazine® is the leading source of information on all aspects of forensic science technology, trends, equipment, services, and laboratory design. In every issue, Forensic Magazine® provides

GC/MS/MS Speed, Sensitivity, and Selectivity Beyond Comparison

Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu's GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications.

Key features include:

- MRM and simultaneous Scan/MRM acquisition modes
- Ultrafast 600 MRM transitions/sec
- True scan speed of 20,000 u/sec
- Fully optimized collision energy for each MRM transition
- Single software platform for all Shimadzu GCMS
- Front-access source for easy maintenance

Sexually Violent Crime: The Body as Evidence
Taught by Dr. Henry Lee and Dr. Leah Bush
November 3-4, 2014

Sexually violent crime continues to challenge investigators and concern the general public. It has been estimated that every two minutes, someone in the United States is sexually assaulted. In many cases, sexual assault results in homicide. Dr. Henry Lee and Dr. Leah Bush, two of the country's top forensic scientists, will share their individual and collective expertise to help the participants understand the importance of the body as evidence as it relates to sexually violent crimes.

Please visit our course page at http://www.ocpe.gmu.edu/programs/legal/cold_case.php for more information on this exciting

The exceptional talent, skill, and passion of our employees are key to QIAGEN's excellence, success and value.

The Center for Advanced Forensic DNA Analysis (CAFDA) would like to thank all the attendees that came to their Genome ID Forum 2014 - Emerging Forensic Genomic Applications held on September 9 and 10, 2014 in Greenville, North Carolina. Thought leaders from forensic science, research, academia, law enforcement, legal and technology development came together for an open dialogue regarding emerging science and technology applications and adoption through the forensic community. Over 65 forensic scientists, lawyers and researchers across the United States and England attended to discuss the implementation of new technologies and scientific applications in forensic human identification, new challenges in adoption, compliance and acceptance in a court of law. The presentations focused on research on emerging science and technology and the effect these emerging science and technology applications may have on forensic science practitioners. The program included thoughtful roundtable discussions that provided a meaningful exchange of ideas related to the direction of the forensic community concerning emerging technologies. The Center for Advanced Forensic DNA Analysis™ plans for the 2015 [Genome ID](#) Forum have already begun.

online courses. The program includes hands-on experience using EnCase, the industry standard in computer forensic investigation technology, and Forensic Toolkit (FTK), a suite of technologies used to perform forensic examinations of computer systems.
