

American Society of Crime Lab Directors

"THE CRIME LAB MINUTE" NEWSLETTER

President's Message

CFSO Vice Chair

As of October 27, 2014, Jill Spriggs resigned her Vice-Chair position on the CFSO. Matthew Gamette has replaced Jill as the ASCLD representative and CFSO Vice-Chair. ASCLD appreciates Jill's hard work on behalf of CFSO/ASCLD for the last four years. Jill is currently the President-Elect for the California Association of Crime Laboratory Directors (CACLD) and will continue to remain active in sexual assault issues effecting crime laboratories.

2015 ASCLD Symposium

The planning for the 2015 ASCLD Symposium is in full swing, if you are interested in submitting an abstract for a presentation please use the link below.

<http://www.ascldsymposium.com/#!abstract-submission/cdtk>

Have a good week,
Brady Mills
ASCLD President

Crime Lab Report - Fall Edition

For those accredited laboratories that have not yet signed up for the delivery of their free Crime Lab Report newspapers, you have approximately 10 days before the fall 2014 edition goes to print. The fall issue will tackle the complex issues surrounding the testing of rape kits as well as a special HR piece on innovative employee compensation structuring. To sign up, please visit: www.crimelabreport.com/labs

Dear ASCLD Member,

I am a Ph.D. student in the School of Criminal Justice at the University at Albany. I have a M.S. degree in forensic biology and for my Ph.D. dissertation, I am conducting research on the impact of court decisions on crime laboratories in the United States. The goal of the study is to better understand both the practical implications of court decisions for crime labs as well as how labs implement court decisions.

If you are a regular or retired ASCLD member from the U.S., I am writing to invite you to participate in an online survey for my dissertation research. The survey is expected to

take approximately 10 - 15 minutes to complete. Please click on the link below to go to the survey website (or copy and paste the survey link into your internet browser).

The person who responds to this survey should have an understanding of policy implementation in the laboratory. Ideally, this understanding should come from an administrative, supervisory, or managerial role in the lab.

The survey is completely voluntary and strictly anonymous. No identifying information will be requested. The survey software will not collect or store your computer's IP address, your email, or any geo-data about your location.

Survey Link: <http://sgiz.mobi/s3/Court-Decisions-and-Crime-Labs>

Advanced Topics for Human Identification & Data Interpretation

December 2-5, 2015 | Philadelphia, PA

This 4 day course will offer training for forensic biologists and technicians involved in testing and testimony for forensic human identification. Each day will focus on issues of current interest in the field and conclude with an open dialogue panel discussion. Topics Include: Current issues with variability in the interpretation of complex mixtures, designing internal validation studies and interpretation guidelines, alternate approaches to mixture interpretation for challenging samples, evaluation of statistical models for mixed sample sources, and the use of novel techniques.

Distinguished faculty include: John Butler, PhD, Niels Morling, MD, DMSc, Michael Coble, PhD, Charles Brenner, PhD, Charlotte Word, PhD, and other forensic biology professionals.

GC/MS/MS Speed, Sensitivity, and Selectivity
Beyond Comparison

Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu's GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications.

Key features include:

- MRM and simultaneous Scan/MRM acquisition modes
- Ultrafast 600 MRM transitions/sec
- True scan speed of 20,000 u/sec
- Fully optimized collision energy for each MRM transition
- Single software platform for all Shimadzu GCMS
- Front-access source for easy maintenance

demand training courses free of charge. On October 1, 2014 RTI will begin charging nominal course registration fees for content.

Once registered, you will have a 90-day period to access as much on-demand content for that course as you desire and revisit the training as often as you like.

To view a list of affected course, visit the [All Courses webpage](#) and search for "RTI International" in both "Scheduled Event" and "On-Demand" course list.

George Mason University's Office of Continuing Professional Education in Virginia is hosting a 2-day seminar:

Sexually Violent Crime: The Body as Evidence
Taught by Dr. Henry Lee and Dr. Leah Bush
November 3-4, 2014

Sexually violent crime continues to challenge investigators and concern the general public. It has been estimated that every two minutes, someone in the United States is sexually assaulted. In many cases, sexual assault results in homicide. Dr. Henry Lee and Dr. Leah Bush, two of the country's top forensic scientists, will share their individual and collective expertise to help the participants understand the importance of the body as evidence as it relates to sexually violent crimes.

The Center for Advanced Forensic DNA Analysis (CAFDA) would like to thank all the attendees that came to their Genome ID Forum 2014 - Emerging Forensic Genomic Applications held on September 9 and 10, 2014 in Greenville, North Carolina. Thought leaders from forensic science, research, academia, law enforcement, legal and technology development came together for an open dialogue regarding emerging science and technology applications and adoption through the forensic community. Over 65 forensic scientists, lawyers and researchers across the United States and England attended to discuss the implementation of new technologies and scientific applications in forensic human identification, new challenges in adoption, compliance and acceptance in a court of law. The presentations focused on research on emerging science and technology and the effect these emerging science and technology applications may have on forensic science practitioners. The program included thoughtful roundtable discussions that provided a meaningful exchange of ideas related to the direction of the forensic community concerning emerging technologies. The Center for Advanced
