

## American Society of Crime Lab Directors

### ***"THE CRIME LAB MINUTE" NEWSLETTER***

### **President's Message**

Dear colleagues,

The ASCLD Board of Directors recommends that ANSI vote to approve the transformation of ISO/PC 272 Forensic Sciences into a TC.

As most of you are aware, ANSI is the U.S. member body to ISO. ASCLD has become a member of ANSI in order to represent the forensic community on potential ISO standards that can directly impact our processes.

ASCLD, partnering with ANSI has taken on the role of US-TAG (Technical Advisory Group) Administrator. Our role in this process is to review the proposed standard and consult with our US-Technical Advisory Group. The ISO/PC 272 Forensic Sciences committee's scope is "Standardization in the field of forensic sciences". The proposed standard that our US-TAG is currently working on is ISO/DIS 18385, "Minimizing the risk of DNA contamination in products used to collect and analyze biological material for forensic purposes".

The US TAG voted earlier this year to not support the conversion of the PC 272 to the TC272 due to a lack of a work proposal for consideration. Given the recent submission by Standards Australia, ASCLD now believes the conversion of the PC to the TC is in the best interest of the global forensic community. The scope of the TC would move towards the standardization and guidance in the field of Forensic Science. This includes the development of standards that pertain to laboratory and field based forensic science techniques and methodology in broad, general areas such as the detection and collection of physical evidence, the subsequent analysis and interpretation of the evidence and the reporting of results and findings.

The ASCLD Board of Directors continues its support of standards development for forensic science in cooperation with existing bodies both domestically and internationally. The ASCLD community of forensic scientists is appropriately positioned through its existing US TAG to actively participate in the development of proposed ISO standards that will benefit the United States as well as our global partners.

Brady Mills  
ASCLD President

**Advocacy Corner:**

On behalf of the Consortium of Forensic Science Organizations (CFSO) and ASCLD, we would like to sincerely thank our membership for all your work on Coverdell funding. This year has been a huge endeavor for all of us to get Coverdell funded. Most do not understand how very close we came this year to losing this funding program. Due in large part to the efforts of ASCLD members and our CFSO partners and colleagues, the appropriation of 12 million dollars was recently passed in the FY15 federal budget and is now law. You made this possible. Each one of you that wrote a letter, made a phone call, or talked personally to your delegations in Washington. Many of you distributed information and hosted tours. There was a huge response to education during National Forensic Science Week. Congress heard a united message from all of us that this funding is essential for the crime labs and medical examiner offices in this country. ASCLD has been very active this year pushing for changes in the Coverdell program that will benefit your lab. You saw the first results of those ASCLD/NIJ discussions in the recent RTI publication. Those discussions with NIJ continue, and we will continue to push Congress to appropriate the authorized 35 million for Coverdell. You will hear much more about Coverdell next year, but we wanted to finish up the year with a simple message. As we celebrate this holiday season and give thanks for many things, we wanted to say thank you to all of our members for your hard work on this issue.

The New York District Attorney's Office will release a request for proposals in Spring 2015 for jurisdictions seeking to test backlogged rape kits. In order to develop the most effective grant program, we are soliciting the input of stakeholders across the country in jurisdictions with untested rape kits.

**We are asking all local government bodies, police departments, prosecutor's offices, and forensic laboratories with untested kits in police storage, laboratories, or elsewhere, to complete a brief Expression of Interest. More information can be found [here](#).**

**To begin the Expression of Interest, please click [here](#).**

Email [DNABacklog@dany.nyc.gov](mailto:DNABacklog@dany.nyc.gov) with any questions or comments.

GC/MS/MS Speed, Sensitivity, and Selectivity  
Beyond Comparison

Triple quadrupole GC/MS/MS has emerged as a powerful technique for trace-level analysis of drug residues. Shimadzu's GCMS-TQ8030, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications.

Key features include:

- MRM and simultaneous Scan/MRM acquisition modes
- Ultrafast 600 MRM transitions/sec
- True scan speed of 20,000 u/sec
- Fully optimized collision energy for each MRM transition
- Single software platform for all Shimadzu GCMS
- Front-access source for easy maintenance

## **Accreditation Training**

### **ANSI-ASQ National Accreditation Board/FQS**

FQS is a member of the ANSI-ASQ National Accreditation Board family of brands. FQS provides accreditation for ISO/IEC 17025 forensic test laboratories and ISO/IEC 17020 forensic inspection agencies and a wide variety of training, workshops, and academic programs.

### **ISO/IEC 17025 and Audit Preparation Workshop for Forensic Test Agencies**

Attendees of this three-day workshop will obtain a general overview of ISO/IEC 17025 as it relates to forensic test agencies. All of the elements will be reviewed. The standard's applicability, origin, purpose and marketplace will be discussed. Some of the more important concepts will be reviewed such as document control, internal auditing, proficiency testing, traceability and measurement and method witnessing.

[March 23-25, 2015](#), Tampa FL

[September 7-9, 2015](#), Alexandria, VA

### **ISO/IEC 17020 and Audit Preparation Workshop for Forensic Police Agencies**

Attendees of this two-day workshop will obtain a general overview of ISO/IEC 17020 for forensic police agencies. Individual elements of the standard will be reviewed; the standard's applicability to forensic police agencies, origin, purpose and marketplace will also be discussed. Some of the more important concepts, such as document control, internal auditing, proficiency testing, traceability and measurement, and method witnessing will be reviewed.

[March 26-27, 2015](#), Tampa FL

[June 22-23, 2015](#), Durham, NC

[September 10-11, 2015](#), Alexandria, VA

For more information about these workshops, contact FQS at 703-836-0025, ext 208. To register, please click on any of the dates above.

Title: [Fundamentals of Force Calibration and Measurement Uncertainty Boot Camp](#)

March 23 - 24, 2015 - York, PA (\$500 one-day, \$750 two-days)

*(This course is held at in partnership with Morehouse Instrument Company, Inc.)*

The Center for Advanced Forensic DNA Analysis (CAFDA) would like to thank all the attendees that came to their Genome ID Forum 2014 - Emerging Forensic Genomic Applications held on September 9 and 10, 2014 in Greenville, North Carolina. Thought leaders from forensic science, research, academia, law enforcement, legal and technology development came together for an open dialogue regarding emerging science and technology applications and adoption through the forensic community. Over 65 forensic scientists, lawyers and researchers across the United States and England attended to discuss the implementation of new technologies and scientific applications in forensic human identification, new challenges in adoption, compliance and acceptance in a court of law. The presentations focused on research on emerging science and technology and the effect these emerging science and technology applications may have on forensic science practitioners. The program included thoughtful roundtable discussions that provided a meaningful exchange of ideas related to the direction of the forensic community concerning emerging technologies. The Center for Advanced Forensic DNA Analysis™ plans for the 2015 [Genome ID](#) Forum have already begun.

As the innovative market and technology leader, QIAGEN creates sample and assay technologies that enable access to content from any biological

sample.

Our mission is to enable our customers to achieve outstanding success and breakthroughs in life sciences, applied testing, pharma, and molecular diagnostics. We thereby make improvements in life possible.

Our commitment to the markets, customers, and patients we serve drives our innovation and leadership in all areas where our sample and assay technologies are required.

The exceptional talent, skill, and passion of our employees are key to QIAGEN's excellence, success and value.
