

American Society of Crime Lab Directors

"THE CRIME LAB MINUTE" NEWSLETTER

Colleagues,

This week, I am pleased to provide you the 2017 edition of the ASCLD Executive Education Digest. The EED was developed 6 years ago and designed as a "quick read" for symposium attendees who were preparing to travel to the annual symposium. It contains information about the upcoming symposium, a list of the new member candidates to the organization, bios of the candidates running for the Board of Directors, and several pertinent management-related articles.

The past few years, the EED has also contained information beyond even symposium details, such as the Annual Reports from each ASCLD committee as provided by each chair. This is a consolidated way for all ASCLD members to view the accomplishments from the past year.

I hope you will find the 2017 ASCLD Executive Education Digest helpful, informative, and give you an overview of upcoming symposium details as well as the hard work and accomplishments of the organization over the past year.

Link: [2017 Executive Education Digest](#)

I'm looking forward to seeing many of you in Dallas in a couple weeks!

Kindest regards,
Jeremy Triplett

Hotel Reservations and Symposium Information

44th Annual ASCLD Symposium, April 30 – May 4, 2017, Dallas, Texas

The theme for the 2017 symposium is "Continuous Improvement – Leading through Continuous Learning." ASCLD is interested in presentations that focus on innovative techniques to permit managers to mentor and inspire their employees as they strive to continuously improve their organizations. The key goal of 2017 ASCLD presentations is to provide crime lab leadership with actionable tools and transportable information that can be directly applied to improve their operation.

44th Annual ASCLD Symposium hotel room block for the 2017 Symposium is now available!

<http://www.ascldsymposium.com/>

Golf Tournament, May 1st, 2017

Stevens Park Golf Course –

1005 N Montclair Ave, Dallas, TX 75208

Join us for a round of golf with your colleagues and the symposium sponsors for a Best Ball tournament and a chance to win a prize! The shotgun start will be at 12:30pm, with a buffet lunch provided beforehand.

ASCLD will be assigning teams of 4 ahead of time to allow for networking and new opportunities to be presented for all participants.

You can sign up for the golf tournament through our registration system [here](#). You will need to complete a full registration to be signed up for the tournament. The registration cost of \$80/person includes 18 holes of golf, cart fees and lunch. Golf clubs can be rented for an additional charge at the course. Transportation to and from the course is not included.

See you there!

ASCLD Members: we are asking for you to send the following notice regarding a University Research and Forensic Lab collaborative workshop out to your University contacts:

Workshop - Arbinger - Developing and Implementing and Outward Mindset

Cameron Cozzens (Arbinger Institute) is conducting an 8 hour workshop on May 1 to assist leaders in forensic organizations facilitate change. From the authors of the international best-selling books Leadership and Self-Deception, The Anatomy of Peace, and The Outward Mindset comes the workshop that is helping government and corporate leaders dramatically transform their culture. In this workshop, The Arbinger Institute helps resolve the organizational problems—including weak individual performance, lack of accountability, ineffective leadership, poor teamwork, interpersonal conflict and functional silos—that plague many organizations, hurting their results. The root cause of most organizational problems is that employees often unknowingly work with an “inward mindset”—focused inwardly on their own, personal objectives. www.arbinger.com

Workshop - NIJ Research

Bridging the Gap Between Researchers and Practicing Forensic Scientists: The Need for Collaboration The “Forensic Science Research Incubator”

On Sunday, April 30, NIJ is conducting an 8 hour Workshop at the ASCLD Annual Meeting to bring together University Researchers and Forensic Lab Leaders to facilitate research. Grant funding opportunities will also be presented. This workshop is an excellent opportunities to meet face to face to share ideas and forge partnerships. This meeting will also provide an opportunity to learn about the ASCLD Forensic Research initiative. Please check out the specifics at:

<http://www.ascldsymposium.com/events-1/i546th2e508/Bridging-the-Gap-Between-Researchers-and-Practicing-Forensic-Scientists-The-Need-for-Collaboration>

The meeting general information and registration is: <http://www.ascldsymposium.com/> and consider attending.

Workshop NIJ Grant Managers

NIJ Programs for Forensic Laboratories

On Monday, May 1, NIJ is conducting a 4 hour Workshop at the ASCLD Annual Meeting specifically tailored to Grant Managers. This workshop will cover grant requirements and reporting, formula and competitive grants and include recommendations to write a successful competitive grant application.

Specifics for this workshop can be found at: <http://www.ascldsymposium.com/events-2/i54cmq0k133/NIJ-Programs-for-Forensic-Laboratories>

NIJ Forensic Science R&D Reports for ASCLD Crime Lab Minute Vol 9

Solicitation Deadlines Extended

NIJ has extended the deadlines for two solicitations:

- [Research and Evaluation on Drugs and Crime](#) now will close on April 24, 2017.
- [Research and Evaluation in Safety, Health, and Wellness in the Criminal Justice System](#) now will close on May 8, 2017.

Apply now! Funding is available for:

- FY 2017 Sexual Assault Forensic Evidence-Inventory, Tracking, and Reporting Program (SAFE-ITR) Application deadline: April 28, 2017 [Download the solicitation \(pdf, 38 pages\)](#)

<https://www.ncjrs.gov/pdffiles1/nij/250472.pdf>

Statistical Methods for Combining Multivariate and Categorical Data in Postmortem Interval Estimation

<https://www.ncjrs.gov/pdffiles1/nij/grants/250467.pdf>

Citrate Content of Bone: A potential Measure of Post Mortem Interval

A constant concern for forensic practitioners is the determination of the post-mortem interval (PMI) in questioned death cases. A number of methods have been tried to better determine PMI, but all have proven problematic. NIJ-supported researchers at the SUNY Brockport Research Foundation evaluated the citrate method for determining PMI based on a 2010 study that indicated citrate content in bone could be potentially

useful in estimating PMI. The researchers intend to make the interface available free online.

Microspectrophotometry of Fibers: Advances in Analysis and Interpretation

Microspectrophotometry is a standard forensic laboratory technique for the comparison of fibers, however, there are concerns about its discriminating power and significance in a field that is moving toward statistical interpretation of data. In this NIJ-supported project, researchers with the forensic laboratory Microtrace conducted an extensive review of microspectrophotometry to present investigators with a context for relating spectral differences to colorant concentrations in fibers and illustrate cases in which similar, but different, fiber populations could not be discriminated.

ASCLD Webinar: DNA Standards and Guidelines

Date and Time: April 26, 2017 at 1:00 ET

Presenters:
Joel Sutton, the DNA Casework Technical Leader for the United States Army Criminal Investigation Laboratory

Bruce Heidebrecht, DNA Technical Leader for the Biology Section at the Maryland State Police, Forensic Sciences Division

Jerrilyn Conway, Federal Bureau of Investigations

Jocelyn Carlson, Federal Bureau of

Simon Sinek: If You Don't Understand People, You Don't Understand Business

"We're not good at everything, we're not good by ourselves," says Simon Sinek at the 99% Conference. Our ability to build trust and relationships is the key to our survival as a race, and to thriving as ideamakers.

REGISTRATION NOW OPEN

NIST Forensic Science Error Management Symposium

The National Institute of Standards and Technology (NIST) and the FBI invite you to the second international symposium devoted exclusively to the topic of forensic science error management. Join us in Gaithersburg, MD, July 24-28, 2017 for the International Forensic Science Error Management Symposium.

Speakers, panels, posters, and workshops will address ways to detect, measure and mitigate forensic science errors. This symposium promises an eye-opening, candid appraisal of root causes and possible solutions to help identify and reduce forensic science errors.

Investigations, Chair of QAS revision committee.

Forensic DNA Analysis, and in particular interpreting complex DNA mixtures and calculating statistics, can be challenging. The technology is ever more sensitive and analysts are testing a wider variety of samples than ever before. The FBI's Scientific Working Group on DNA Analysis Methods (SWGDM) has issued a new version of the autosomal DNA STR interpretation guidelines that most of the DNA laboratories in the country look to for guidance in analyzing DNA profiles. Mr. Sutton will be presenting information on the changes to the interpretation Guidelines including the background and scope of the changes. Specific examples will be presented. Mr. Heidebrecht and Ms. Conway will be answering questions and providing additional comments. In addition, Ms. Jocelyn Carlson will be presenting on the efforts of FBI and SWGDAM to revise the FBI's Quality Assurance Guidelines for DNA Testing Laboratories.

Forensic Crime Lab Strategic Business Plan

We develop and write Strategic Business Plans for forensic crime labs. Here are the type of questions and challenges we can help answer and overcome:

- Multiple Crime Lab Consolidation
- Medical Examiner Office and Crime Lab Mergers
- Multi Agency Regional Partnerships
- New Lab Considerations; Equipment Planning, Operational Cost Planning, Workload Measurement, Staff Planning
- New Equipment Forecasting and Funding Justification
- Operational Cost Forecasting
- Long Term Budget Forecasting

We can, together, develop a Forensic Crime Lab Strategy Plan that will make your lab more efficient, work within your operational budget, and deliver flawless work.

OSAC Subcommittees

[Bode Cellmark Forensics](#) provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode's newest offerings include:

[Sexual Assault Kit Backlog Reduction Program](#) streamlines processes to eliminate backlogs of untested sexual assault kits.

[Bode Buccal 2™](#) is uniquely designed to improve DNA databanking collecting and automate processing. The Bode Buccal 2 is a DIRECT COLLECTION SYSTEM that requires minimal training. There is NO Transfer Step Required.

[Independent Validation Services](#) are customized to meet your laboratory's needs. Validation services provide completely unbiased analysis on your equipment, chemistries, or process.

FORESIGHT 20./20

The American Society of Crime Laboratory Directors (ASCLD) has received funding from the Laura and John Arnold Foundation to develop software that will transfer data from forensic Laboratory Information Management Systems (LIMS) to FORESIGHT, a business quantitative process tailored to forensic laboratories

The goal of the project, called FORESIGHT 20/20, will be to allow laboratories to easily upload business-relevant information from their individual LIMS to the FORESIGHT project, hosted at West Virginia University.

Foresight 20/20

Just Science Podcast Interviews

RTI International in partnership with the Forensic Technology Center of Excellence, a program of the National Institute of Justice, Department of Justice, is producing a podcast called "Just Science". The Just Science podcast is designed to reach a broad audience of forensic scientists and other professionals who collaborate with the forensic science community.

As part of the podcast series, RTI would like to interview any ASCLD members who would like to share interesting or unusual criminal cases, now closed or adjudicated, where forensic science was critical to the outcome of the case. Our goal is to provide the audience with a positive view of the importance of forensic science in criminal

Featured Article:

His name was Wilmer Souder. A physicist at the National Bureau of Standards, now known as the National Institute of Standards and Technology (NIST), Souder played an important role in the early days of forensic science. He helped send countless murderers, bootleggers, gangsters and thieves to prison, and he kept such a low profile partly out of concern for his and his family's safety. Perhaps as a result, he was not long remembered for his forensic work, and his influence on the developing field of forensic science was not as great as it might have been.

NIST Library just finished scanning Souder's nine notebooks and has made them available for anyone to view via the NIST Digital Archives:

<http://nistdigitalarchives.contentdm.oclc.org/cdm/landingpage/collection/p16009coll67>

Bringing together experts from the forensic, research, legal, and law enforcement communities to strengthen forensic science and create a safer, more just society.
<https://www.nist.gov/topics/forensic-science>

investigations. The timing of the cases is not important, although preference will be given to cases involving some personal experience and that can be the subject of an in-depth conversation. The audio only recording usually takes 40 to 60 minutes, depending on the content, and all disciplines are welcome. We would like to do the recordings during the ASCLD annual symposium in Dallas, Texas.

The available dates are Tuesday, May 2nd and Wednesday, May 3rd, and we can accommodate your schedule. Please e-mail Lauren Mangum from RTI International at lmangum@rti.org with a short overview of the case and methods used. This is a great way to disseminate your, or your crime laboratory's work to a wide audience, hopefully sparking conversations, new ideas, and inspiring others within the field to approach cases in alternative ways. You can change the position of the caption and set styles in the block's settings tab.

Establishment of an Office of Forensic Sciences and a Forensic Science Board Within the Department of Justice

Revision 2/14/17

http://thecfso.org/advocacy/20170214_CFSO_OFS_Proposal_Rev.pdf

Formed in 2000, CFSO is an association of six forensic science professional organizations: American Academy of Forensic Sciences; American Society of Crime Lab Directors; International Association for Identification; International Association of Forensic Nurses; National Association of Medical Examiners; and Society of Forensic Toxicologists - American Board of Forensic Toxicology.

These professional organizations together represent more than 21,000 forensic science professionals across the United States.

The mission of the CFSO is to speak with a single forensic science voice in matters of mutual interest to its member organizations, to influence public policy at the national level and to make a compelling case for greater federal funding for public crime laboratories and medical examiner offices. The primary focus of the CFSO is local, state and national policymakers, as well as the United States Congress.
