

## American Society of Crime Lab Directors

### "THE CRIME LAB MINUTE" NEWSLETTER

Dear Colleagues,

There are approximately 400 full service crime labs in United States. Our crime labs cover every conceivable jurisdiction, serving clients with varying needs. With all our variation, we also have a lot in common, including facing challenging issues involving management, accreditation, legislation and research to name a few. Through our diversity, we address common problems from a variety of perspectives, approaching each with some novel and innovative solutions. The chance that another crime lab has not encountered a similar problem is unlikely. What is likely is that another member of our organization, probably you, has not only dealt with that same issue, but has come up with a great solution.

Enter ASCLD's latest foray into by tapping our best resource: you and colleagues just like you. As our shared expertise and experience is our best resource, we are kicking off our **members' forum** on the ASCLD website. Please log in under member resources and go to <https://www.asclcd.org/forums/> to check it out.

We have started with general topic areas of Management, Research, Organization and "Water Cooler" for miscellaneous discussion. We will also be posting some questions to spur feedback that will guide our organization to ensure we continue to do our best in representing you and our profession. Post a question, provide an answer, get involved. We look forward to hearing from you.

Ray Wickenheiser

ASCLD President

It is with great sorrow that ASCLD shares the below information on the passing of Emeritus Member Bruce Vanderkolk.

Bruce W. VanderKolk, 72, of Bonita Springs, FL and formerly of Oregon, IL, died Sunday, February 18, 2018. He was born March 16, 1945 in Allegan, MI, the son of Wiley and Violet VanderKolk. He married Donna Sue Townsend in 1968.

Mr. VanderKolk graduated from Hopkins High School in 1963 and from Michigan State University in 1967. He received his Masters degree in 1977 from the University of Illinois at Chicago.

While at Michigan State University he was a member of the ROTC program and upon graduation he was commissioned a Second Lieutenant. He served in the active Army from 1967-1969 and was a Vietnam veteran. Upon leaving the active Army in 1969, he remained in the Reserve Components and retired in 1994 from the Illinois National Guard as a Brigadier General. He received the Legion of Merit, Bronze Star, Meritorious Service Medal with two oak leaf clusters and Army Commendation Medal with one oak leaf cluster.

After leaving the active Army, he joined the Illinois State Police in 1969 and served in a variety of positions, retiring in 2001 as the Commander of the Forensic Sciences Command. He was an Emeritus member of the American Society of Crime Laboratory Directors and Midwestern Association of Forensic Scientists.

He was a member of Anchor Christian Church in Bonita Springs, FL where he and his wife lived. He was a prior member of Southside Christian Church in Springfield, IL. While living in Oregon, IL, he attended the Oregon Church of God. He was a member of Oregon VFW Post 8739 and Oregon American Legion Post 97.

Mr. VanderKolk is survived by his loving wife of 49 years, Donna Sue; his sons, Roger VanderKolk of Woodbury, MN and James (Shelia) VanderKolk of Oregon, IL; and seven cherished grandchildren, Ethan, Corey, Sean, Matthew, Nadia, Caelyn and Madilyn.

A funeral service was held Thursday, February 22, 2018 at 11:00 a.m. at Anchor Christian Church, Bonita Springs.

Services will also be held in Springfield, IL and Allegan, MI.

In lieu of flowers, the family suggests that memorial contributions be made to the Anchor Christian Church Building Fund, 11651 E Terry Street, Bonita Springs, FL 34135.

Arrangements are being handled by Shikany's Bonita Funeral Home.

To send flowers or a memorial gift to the family of Bruce W. VanderKolk please visit our [Sympathy Store](#).

---

Register for 2018 ASCLD Symposium

### ASCLD Bring Your Own Slides Sign-up

Date: Wednesday, May 23, 2018

Time: 6:30 pm to 8:00 pm (TENTATIVE – session length may be adjusted)

Location: Atlanta Marriott Marquis Hotel (Room TBD)

#### **Bring Your Own Slides at ASCLD 2018**

NEW to the ASCLD symposium in 2018 is an opportunity for crime laboratory leaders to Bring Your Own Slides and participate in an informal, evening discussion on shared challenges and solutions in our laboratories.

The Bring Your Own Slides session will be held on Wednesday evening, May 23. If you would like to share a problem or a novel solution to a problem that you have encountered in your laboratory, please sign up to provide a brief (approximately 5 minutes) overview. Time will then be allotted for questions and discussion on the topic so that all attendees may benefit from each other's shared expertise.

Bring You Own Slides topics should be:

- **Brief** – describe the problem or solution in approximately 5 minutes to allow time for questions and/or discussion
- **Unique** – describe a new/relevant problem or a novel solution to an old problem
- **Relevant** – topics should apply to managers within a crime laboratory

*Space is limited to approximately 10-15 topics/presentations. Presentations will be accepted on a first-come first-serve basis.*

If you would like to sign up, please submit the form found [HERE](#) to Jeremy Triplett at [Jeremy.triplett@asclcd.org](mailto:Jeremy.triplett@asclcd.org).

ASCLD has arranged for a special workshop at the ASCLD symposium this year. We have been working with West Virginia University on Project FORESIGHT for quite some time. ASCLD further has been working on getting the LIMS vendors for more automated reporting of Project Foresight metrics. We want more labs to get involved in this project and we hope to show you how to start gathering this data and reporting it.

#### **FORESIGHT and FORESIGHT 2020: A Formula for Success**

How is your lab performing? Do you know--*really know*? What's your internal progress compared to last year or the year before or the last 5 years? Have you added or changed new processes? Has management or your administration changed and do you need to make arguments for better resources? Where does your lab stand compared to other labs of its size or caseload?

FORESIGHT was created in 2008 as a business benchmarking process for forensic laboratories to analyze, evaluate, and share their performance. Since then, it has been used by hundreds of laboratories around the world to improve effectiveness and efficiency of laboratory services to stakeholders. But many managers are unsure what might be required to participate, how to collect, submit, and (agonizingly) analyze the data they need to be part of FORESIGHT? This workshop will walk you through the process of FORESIGHT from start to finish, giving you the tools you need to fill out the Laboratory Reporting and Analysis Tool (LabRAT) and what the FORESIGHT 2020 project means for you. Using FORESIGHT has gotten easier as well and even basic input can yield useful operational information--you don't necessarily need every scrap of data you might think you need. With FORESIGHT 2020, a software project that links LIMS to FORESIGHT, it is now easier than ever to improve a laboratory's function, gain insights to process improvements, and make arguments for resources that persuade decision makers.

This workshop will provide an overview of benchmarking and process improvement, FORESIGHT as a method for laboratory analysis and evaluation, and the uses of FORESIGHT 2020 to provide immediate and clear feedback about laboratory performance. Participants will gain a better understanding of how industries self-analyze, what the forensic enterprise has done to create a culture of improvement through benchmarking, and how FORESIGHT provides superior feedback in context for laboratories to achieve greater efficiencies. No experience with FORESIGHT is necessary--new users, experienced users, and "tire-kickers" are all welcome.

Learn how to use "big data" to your advantage, make the case for the resources you need, and deliver better services with greater efficiency using FORESIGHT. Join us for this workshop!

#### Probabilistic Genotyping: Theory and Implementation

Instructors: Dr. Michael Coble (NIST), Annette J. Ortiz (Denver Police Department Crime Laboratory), Kristen Schelling (Michigan State Police), and Brandon Good (Michigan State Police)

When: April 23 – 25, 2018 (8:00a – 5:00p each day)

Where: Brookfield, Wisconsin (Suburb of Milwaukee)

Training Location & Lodging: Sheraton Milwaukee Brookfield Hotel, 375 S. Moorland Rd, Brookfield, WI 53005(\$104/night + tax; be sure to mention MAFS when reserving your room)

Cost: \$200 MAFS Member / \$350 Non-MAFS Member

Workshop Coordinator: Sharon Polakowski ([polakowskim@doj.state.wi.us](mailto:polakowskim@doj.state.wi.us))

Cancellation Date\*: March 23, 2018 (20 min / 35 max)

The first two days of the workshop will be presented by Dr. Michael Coble from NIST and cover the basics of probabilistic genotyping, including likelihood ratios. The remaining one day will be presentations by representatives from agencies who have implemented PG. They will discuss validation, training of analysts, prosecutors, and defense attorneys, and further 'nuts and bolts' of implementation, including some data.

Visit [MAFS.net](http://MAFS.net) to register and for further details.

\*The workshop will be cancelled if its minimum number of registrants is not met by the cancellation date. Registration will remain open after the cancellation date if the minimum is met.

#### Advanced Courtroom Testimony for the Drug Chemist

Instructor: Tim McKibben

When: May 7-8, 2018 (8:00am—5:00pm each day)

Where: Dayton, Ohio

Training Location & Lodging: Crown Plaza Dayton (\$101/night + tax; be sure to mention MAFS when registering for your room)

Cost: \$200 MAFS Member / \$350 Non-MAFS Member

Workshop Coordinator: Jennifer Watson ([watsonj@mcohio.org](mailto:watsonj@mcohio.org))

Cancellation Date\*: March 1, 2018 (30 min / 60 max)

This two-day workshop is aimed at educating drug chemists beyond the basics of testimony related to drug analysis. Topics covered may include but are not limited to: handling opposing experts in general, reviewing opposing expert's reports and what to focus on, Daubert (or Frye) hearings (how to get started, how to educate the attorney, etc), how to explain chemistry/chemical structures to a jury (related to analog and pharmacophore cases; what to do, what not to do), common opposing expert tactics and how to conquer them, how to aid in the prosecution's/defense's understanding of analog/pharmacophore cases, spectral interpretation as it relates to testimony, how to handle when an opposing expert "muddies" the water when testifying about chemistry related topics, case law that supports Dauberts (or Frye)/opposing reports etc, and how to introduce new technologies in court that have not previously been used in the area/district. The training will also include practical exercises.

This workshop is open to drug chemists working in local, state and federal laboratories.

Visit [MAFS.net](http://MAFS.net) to register and for further details.

\*The workshop will be cancelled if its minimum number of registrants is not met by the cancellation date. Registration will remain open after the cancellation date if the minimum is met.

# FORESIGHT Overview

Managers of scientific laboratories see themselves as scientists first and managers second; consequently, they tend to devalue the managerial aspects of their jobs. Forensic laboratory managers are no different but the stakes may be much higher given the importance of quality science to the criminal justice system. The need for training and support in forensic laboratory management has been recognized for many years but little has been done to transition the tools of business to the forensic laboratory environment.

## Project FORESIGHT Annual Report, 2015-2016

Forensic Science Initiative, College of Business & Economics, West Virginia University

Welcome to the Laboratory Reporting and Analysis Tool (LabRAT), part of the FORESIGHT project. The following worksheets address a variety of questions regarding the allocation of resources within your laboratory. With each worksheet, the requested items are highlighted in the yellow shaded cells. Other cells, with white backgrounds, may have data in the form of automated calculations. Do not worry about completion of items in those white background cells.

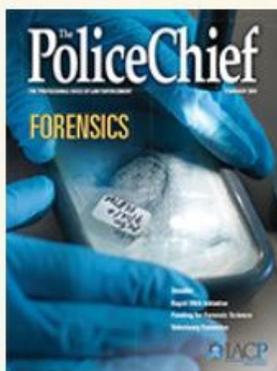

Organization (Data Source)		Competing the Lab Rat	
Initial Day of Fiscal Year (dd/mm/yyyy)			
Final Day of Fiscal Year (dd/mm/yyyy)			
Laboratory Detail		Laboratory LabRAT project man

### FEBRUARY 2018 ISSUE

#### Forensics

Forensic science dates back well over 200 years, when Scotland Yard first connected a bullet to the murder weapon (1835) and the first fingerprint classification system was developed (1892). The field has advanced significantly since then, and, when used effectively, forensic science-in all its many forms-can provide valuable contributions to law enforcement's pursuit of justice and public safety.

[READ CURRENT ISSUE](#)

Subject: CSafe Survey on Current Forensic Reporting Practices  
<https://forensicstats.org/about/>

[You are being asked to participate in a research study on forensic reporting practices.](#) The purpose is to understand how forensic results are being reported in crime laboratories right now.

The survey is being administered by [The Center for Statistics and Applications in Forensic Evidence \(CSafe\)](#).

As you probably know, CASFE was named a Forensic Science Center of Excellence by the National Institute of Standards and Technology to "support NIST's efforts to advance the utility of probabilistic methods to enhance forensic analysis." CSafe has partnerships with many forensic laboratories including the Midwest Forensic Resource Center.

You will be compensated for your participation in this research study with attractive CSafe mementos.

The results of the survey will be analyzed by CSafe and potentially published. However, individual participants will not be identified. We are required to report the results only in an aggregate manner that prevents associating responses with any particular laboratory or individual.

The survey is expected to take around 1 hour, although that will vary according to the answers given.

**Please complete this survey by March 31, 2018**

ASCLD is excited to announce the addition of new awards to be debuted at the symposium this year. There are so many wonderful initiatives ASCLD and its members are involved in that we are pleased to be able to recognize more of them.

Awards include:

- ASCLD Member of the Year – ASCLD member who has made significant contributions to the organization in the past year. (Nomination form will be distributed to membership in advance of the symposium.)
- FORESIGHT – Most innovative success story epitomizing the tenets of FORESIGHT.
- Symposium Presentations by a member – The best presentation as voted by the audience.
- Symposium Attendee with longest membership.
- Best Capstone presentation from the Leadership Academy – voted upon by Leadership Academy participants and instructors.
- FTCoE / NIJ / ASCLD Webinar of the Year – Attendance and audience feedback will be key indicators for selection of this award.
- Briggs White - Exceptional competence and achievement in any area of public administration, leadership shown in the direction or development of programs, creativity and resourcefulness, adherence to the basic principles of enlightened public service, integrity and dedication to duty. (<https://www.ascl.org/nominations/>)

In addition to the existing and new awards, ASCLD will be recognizing members in other new areas. Please be sure to join us for this year's Awards Banquet in Atlanta!

Dear Forensic Science Professionals,

The Forensic Science Training Institute is offering a workshop titled "Contextual Bias in Forensic Science" March 13-15, 2018.

The topic of "bias" and its implications for forensic practice has been hotly debated and researched in forensic and academic circles over the last decade. The 2009 National Academy of Sciences (NAS) report on the state of forensic science in the USA and the 2016 President's Council of Advisors on Science and Technology (PCAST) report on forensic science recommend that forensic practitioners address issues relating to bias in forensic science and provide evidence to the fact finder that they have done so.

This workshop uses an engaging and innovative mixture of lectures, case examples, and practical activities to educate participants on the theoretical concepts and practical implications of bias within forensic science. Participants will receive instruction on the various types of bias, how to identify its presence, how to mitigate its influence, methods on how to sequentially unmask data, procedures used to identify task-relevant information, concepts for the appropriate management of case-specific contextual information and how to appropriately document critical decision pathways.

This workshop is primarily aimed at forensic science practitioners both scene or laboratory based, especially those involved in the early identification, collection and interpretation of evidence. It is however designed to benefit anyone who produces, uses or relies upon forensic science for decision making purposes within the justice system, including judges, district attorneys, defense lawyers, and detectives.

The workshop is \$395 per person.

For registration, please visit: <http://www.cedarcrest.edu/forensic/18/2.htm>

## 45th Annual ASCLD Symposium

Advancing Forensic Science requires leadership, which includes taking initiative, motivating employees, and applying resources creatively to the complex problems presented by today's forensic casework and issues. Leaders lead by example and encouragement, building on success and learning from their past experiences and that of others.

Please join us in Atlanta, Georgia, May 20-24th for the 2018 ASCLD Symposium where you will learn about exciting initiatives to advance forensic science. New and experienced managers and directors will be presented with innovative tools to sharpen their leadership skills. Presentations from experts and leaders, both inside and outside the forensic science community, will cover various aspects of leadership. Our goal is to invigorate you with techniques and information to increase your leadership capacity in both life and occupation.

## Volunteer Opportunity

The American Association for Laboratory Accreditation (A2LA), provider of accreditation to forensic organizations and other testing and testing related providers, is seeking forensic science practitioners to serve on a voluntary basis on the A2LA Forensic Examination Advisory Committee (FEAC) and A2LA Accreditation Council (AC). Participation is primarily through electronic communication (e.g. teleconferences, emails, online portal) and benefits of membership include: networking opportunities with other practitioners and technical experts from other fields, increased knowledge of the accreditation process, ability to provide technical input in areas of accreditation and quality assurance, and an invitation to attend the A2LA Technical Forum and Annual Meeting. Additionally, Accreditation Council (AC) members become honorary members A2LA, the association, and gain access to unique presentations and trainings such as ISO/IEC 17025:2017 and similar. For additional information, please see the <https://www.a2la.org/genweb/tac.cfm> page to learn about A2LA's Technical Advisory Committees or <https://www.a2la.org/AC/Join-Accreditation-Council.cfm> for information on the A2LA Accreditation Council."

## JOB OPPORTUNITIES (Hiring now)

Due to a recent upgrade with the newsletter software, visit <http://www.ascl.org/jobs2> to link and view details about job announcements listed below.

- [Forensic Science Internship & Forensic Biology & DNA Internship](#), The Public Defender Service for the District of Columbia, Washington, Expires: March 30, 2018
- [Forensic Chemist](#), Rapid City Police Department, Rapid City, SD, Expires: May 18, 2018
- [Forensic Scientist I- Drug Chemistry](#), Colorado Bureau of Investigation, Pueblo, CO, Expires: March 20, 2018
- [Forensic Scientist I- Toxicology](#), Colorado Bureau of Investigation, Pueblo, CO, Expires: March 20, 2018

- [Forensic Biologist – Crime Lab Scientist](#), Georgia Bureau of Investigation, Decatur, GA & Moultrie, GA, Expires: February 28, 2018

### The Need for Safety Officers and a Health and Safety Committee

The elements of a Chemical Hygiene Plan (CHP) have been the subject over the last few weeks. Previous topics have been 1) the need for SOPs (Standard Operating Procedures), 2) Criteria for Implementing Control Measures, 3) requirement to ensure that fume hoods and other protective equipment are functioning properly and identify the specific measures the employer will take to ensure proper and adequate performance of such equipment, and 4) Required Information to be provided to lab personnel working with hazardous substances. This week's topics are 5) *the circumstances under which a particular laboratory operation, procedure or activity requires prior approval from the employer or the employer's designee before being implemented, and 6) Designation of personnel responsible for implementing the CHP, including the assignment of a Chemical Hygiene Officer and, if appropriate, establishment of a Chemical Hygiene Committee.*

5) *The circumstances under which a particular laboratory operation, procedure or activity requires prior approval from the employer or the employer's designee before being implemented.* Prior to any new work being conducted in a lab that uses a hazardous chemical, prior approval must be acknowledged. Prior approval would normally come from the Chemical Hygiene Officer (CHO) or Safety Officer in your lab. Many procedures use chemicals that require special considerations. Additionally, some labs may not have the proper storage or work area for its use. Also, the chemical must be added to the chemical inventory, all personnel who will work with or come in contact to the chemical must read the Safety Data Sheet (SDS). Having a plan where an employee has read the SDS and understands the hazards by signing a review sheet or some other acknowledgement is a good way to improve compliance. Additionally, ordering and purchasing hazardous chemicals should go through one person or a team so that proper storage locations, policies, and procedures can be appropriate for chemicals ordered.

6) *Designation of personnel responsible for implementing the CHP, including the assignment of a Chemical Hygiene Officer (CHO) and, if appropriate, establishment of a Chemical Hygiene Committee.* Designating a person, such as a CHO or Safety Officer for day-to-day administration of chemical issues is paramount and crucial for accreditation. A CHO will provide reports at the department Safety Committee meetings on chemical hygiene activities performed. Additionally, a CHO will work with others to develop, review and approve Standard Operating Procedures which detail all aspects of proposed laboratory activities that involve hazardous materials. A Chemical Hygiene Committee, commonly known as a Safety Committee (or Health and Safety) in forensic labs is also a requirement for accreditation. Health and Safety committee members should establish a committee structure and process and develops an action plan for the year that identifies a few priority health and safety issues to work on. The concerns would be addressed at safety committee meetings and the executive management meeting(s).

Jane B. Northup

Quality Assurance Officer

# TRAINING OPPORTUNITIES

---

In 2018, the Forensic Science Training Institute will be offering a week-long course in Advanced Fabrics Bloodstain Pattern Analysis Training on March 19-23.

The class size is limited to twelve, so please register early to ensure your seat.

For registration and full details on the course requirements, visit the Forensic Science Training Institute website here: <http://www.cedarcrest.edu/forensic/16/1.htm>

---

**Recorded Training:**

**Episode 9 Podcast!!**

Just Blood Spatter

In episode nine of Just Science, funded by the National Institute of Justice's Forensic Technology Center of Excellence [Award 2016-MU-BX-K110], we spoke with Dr. Marc Smith, from the Georgia Institute of Technology. Dr. Smith's NIJ funded research in blood spatter has connected computational fluid dynamics with empirical studies to improve the understanding of blood spatter onto solid, slanted surfaces. His work looks at many variables, including droplet size, speed, surface roughness and wettability. [Listen and Subscribe HERE.](#)

2018 National Institute of Justice Forensic Science Symposium

## New Narcotics Protection Kit as You Face the Dangerous Opioid Epidemic

**We designed this single-use kit following DEA & CDC guidelines**

Small amounts of Fentanyl can cause an overdose, a significant threat to you & your department. We designed this kit to help you stay safe.

## What Is OSAC Up To? A Behind the Scenes Look

• February 20, 2018 •

### MEETING PLAN:

The Organization of Scientific Area Committees (OSAC) for Forensic Science works to strengthen the nation's use of forensic science by facilitating the development of scientifically sound forensic science standards and by promoting the adoption of those standards by the forensic science community. OSAC has over 550 members and 250 affiliates that work together to develop and evaluate forensic science standards via a transparent, consensus-based process that allows for participation and comment by all stakeholders.

This event will feature presentations from the Chairs of the five Scientific Area Committees (SAC), three Resource Committees, Statistics Task Group, and Forensic Science Standards Board (FSSB). Each presenter will describe their OSAC unit's activities including the latest standards under development, research gaps identified, challenges being addressed, and priorities for 2018.

### TUESDAY - FEBRUARY 20

8:00 AM – 8:15 AM: Forensic Science Standards Board (FSSB) Update  
*Steve Johnson, Chair, FSSB*

8:15 AM – 8:30 AM: How Should Standards Minimize the "B-word" (Bias) in Forensic Science  
*William Thompson, Chair, Human Factors Committee*

8:30 AM – 8:45 AM: The Attorneys, Love 'em or Hate 'em, You Can't (should not) Do Standards Without 'em  
*Chris Plourd, Chair, Legal Resource Committee*

8:45 AM – 9:00 AM: The Yellow Brick Road to Standards Development  
*Karen Reczek, Chair, Quality Infrastructure Committee*

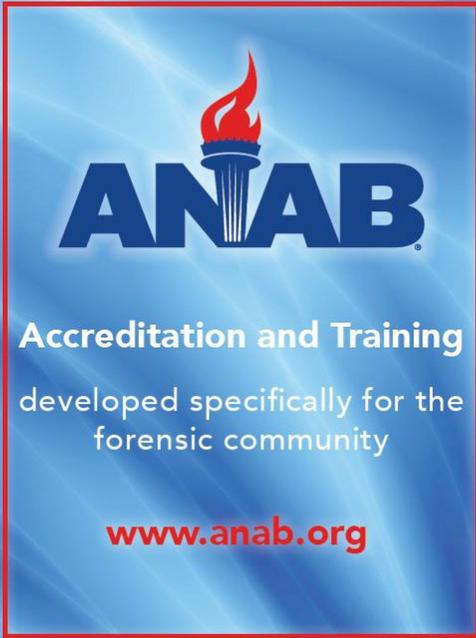

9:00 AM – 9:15 AM: Statistics is Never Having to Say You're Certain  
*Karen Kafadar, Chair, Statistics Task Group*

9:15 AM – 9:30 AM: **BREAK**

**The Forensic Science Leadership Series  
at Cedar Crest College**

2018 Workshops

Cedar Crest College, Allentown, Pennsylvania  
March 19th to 23rd, 2018

**Course Instructors**

Dr. Mark Reynolds  
Mr. Edmund (Ted) Silenieks

**Introduction**

This course is designed primarily for practitioners who routinely examine blood stained clothing and other textiles and are required to assess, interpret, and report on bloodstain patterns as part of those examinations. The course is delivered through a combination of “face to face” instruction and self-directed learning. A minimum 80 hours of structured learning activities is required, inclusive of a 40 hour “face to face” residential component. The course will review the underpinning principles of BPA, and apply these principles to the analysis and interpretation of bloodstains on clothing and

**NIJ FY18 Graduate Research Fellowship in Science, Technology, Engineering, and Mathematics**

The summary for the NIJ FY18 Graduate Research Fellowship in Science, Technology, Engineering, and Mathematics grant is detailed below. This summary states who is eligible for the grant, how much grant money will be awarded, current and past deadlines, Catalog of Federal Domestic Assistance (CFDA) numbers, and a sampling of similar government grants. Verify the accuracy of the data FederalGrants.com provides by visiting the webpage noted in the [Link to Full Announcement](#) section or by contacting the appropriate person listed as the [Grant Announcement Contact](#). If any section is incomplete, please visit the website for the National Institute of Justice, which is the U.S. government agency offering this grant.

**NIJ FY18 Graduate Research Fellowship in Science, Technology, Engineering, and Mathematics:** The Graduate Research Fellowship in Science, Technology, Engineering, and Mathematics (GRF-STEM) provides awards to accredited academic institutions to support graduate research leading to doctoral degrees in topic areas that are relevant to ensuring public safety, preventing and controlling crime, and ensuring the fair and impartial administration of criminal justice in the United States.

LabCorp Specialty Testing Group

[Bode Cellmark Forensics](#) provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode's newest offerings include:  
[Sexual Assault Kit Backlog Reduction Program](#) streamlines processes to eliminate backlogs of untested sexual assault kits.

[Bode Buccal 2™](#) is uniquely designed to improve DNA databanking collecting and automate processing. The Bode Buccal 2 is a DIRECT COLLECTION SYSTEM that requires minimal training. There is NO Transfer Step Required.

[Independent Validation Services](#) are customized to meet your laboratory's needs. Validation services provide completely unbiased analysis on your equipment, chemistries, or process.

**CONSORTIUM OF FORENSIC SCIENCE ORGANIZATIONS (CFSO)**

**FLASH BRIEF**  
FALL 2017/WINTER 2018

*The mission of the CFSO is to speak with a single forensic science voice in matters of mutual interest to its member organizations, to influence public policy at the national level, and to make a compelling case for greater federal funding for public crime laboratories and medical examiner offices. The primary focus of the CFSO is local, state, and national policymakers, as well as the United States Congress.*

other textiles.

When examining clothing, the practitioner must be mindful of influences such as the fibre type, texture, treatments, all of which may affect the final appearance of bloodstains. The primary focus of the course is to develop those skills required for the examination of bloodstain patterns found on clothing items, including the use of microscopy to discriminate between spatter and transfer bloodstains

Since 1995, JusticeTrax has produced a suite of products geared specifically toward the law enforcement and forensic community. Over the years, our applications have gained increasing acceptance among city, county, state and federal law enforcement agencies. Our applications are designed by forensic scientists and are the most comprehensive case management tools available.

With installations ranging from small, single-site laboratories of five users, to extremely large multi-site installations with 500+ users, we are honored to serve some of the most sophisticated crime laboratories in North America, Australia, the Caribbean, and the Middle East. Of these 175+ laboratories, greater than

**NIJ Forensic Science R&D Reports for ASCLD Crime Lab Minute Vol 11**

These research reports have been submitted by the National Institute of Justice (NIJ) especially for their relevance to crime laboratory activities. ASCLD has not reviewed nor does it necessarily endorse the findings of this research.

[NIJ-FBI Fingerprint Partnership Identifies 200 Missing Persons](#)

In March of this year, a new collaboration began between the National Institute of Justice and the FBI Laboratory. Fingerprints from unidentified missing persons are sent to the FBI where a new technology, known as Next Generation Identification, along with enhanced processing protocols, is improving the odds of identification. Identifications are increasing even with poor quality prints or with those that have been searched in the past.

[National Best Practices for Sexual Assault Kits: A Multidisciplinary Approach](#)

The National Institute of Justice recently released a report on National Best Practices for Sexual Assault Kits: A Multidisciplinary Approach in response to the Sexual Assault Forensic Evidence Reporting (SAFER) Act of 2013, which focuses on the accurate, timely, and effective collection and processing of DNA evidence in sexual assault investigations. A practitioner working group developed 35 recommendations that provide a roadmap for collecting, transferring, preserving, storing and analyzing sexual assault kits. The recommendations apply to medical professionals, members of law enforcement, victim advocates, prosecutors and laboratories. A coordinated, collaborative and multidisciplinary approach to sexual assault investigations helps reassure and support victims of sexual violence, encourages victim engagement and increases the potential for just legal resolutions.

[The Fingerprint Sourcebook is Now Available in Spanish](#)

NIJ has released a Spanish-language version of The Fingerprint Sourcebook, which aims to be the definitive resource on the science of fingerprint identification. The Sourcebook was prepared by the International Association for Identification and topics covered include the anatomy and physiology of friction ridge skin; techniques for recording exemplars from both living and deceased subjects; AFIS; latent print development, preservation and documentation; equipment and laboratory quality assurance; perceptual, cognitive and psychological factors in expert identifications; and legal issues.

[Forensic Identification Using Individual Chemical Signatures](#)

NIJ-funded researchers developed an approach to translate chemical signatures

recovered from personal objects such as phones into a lifestyle sketch of the owner, using mass spectrometry and informatics approaches.

#### [Quantifying Error Rates for the Measurement of Human Skeletal Remains](#)

NIJ-funded researchers revised forensic anthropology procedures to include an "error metric" for the measurement of human skeletal remains. This article summarizes findings from that study.

#### [Designing Methods to Identify Evolving Designer Drugs](#)

This article describes an NIJ-supported research project focused on issues of resolution and discriminatory capabilities needed to increase the reliability and selectivity of forensic evidence and analytical data for new bath salt-type drugs of abuse.

#### [Standardized Process Developed for Identifying Dyes in Fibers](#)

This article summarizes method with the twofold purpose of producing a novel, reliable, and useful microfluidic system for fabric dye extraction and increasing the knowledge needed to guide criminal justice policy and practice related to the forensic analysis of dyed fabric.

#### [The Most Important Features for an Effective Sexual Assault Response Team](#)

Sexual Assault Response Teams (SART) hold the promise of improving victim experiences, increasing prosecution rates, and reducing the prevalence of sexual assault. To understand how an effective SART works, NIJ-funded researchers studied the structure and operations of SARTS across the United States.

#### [Identifying Ignitable Liquids in the Aftermath of A Fire](#)

In a wide-ranging analysis of the effects of weathering and biological degradation on ignitable liquids, NIJ-supported researchers at the University of Central Florida's National Center for Forensic Science studied and classified 50 liquids in the Ignitable Liquids Reference Collection database.

#### [Scale Modeling in Fire Reconstruction](#)

After reviewing scaling theory used in fire research, this project developed scaling rules for design fires and enclosure material boundaries, followed by the full-scale testing of a gas burner, heptane pool fire, pine wood crib, and polyurethane foam, and the scaling theory was applied to the full-scale scenario and a 1/8 scale compartment.

#### [Evaluation of the Use of a Non-Contact 3D Scanner for Collecting Postmortem Fingerprints](#)

Historically, the recording of postmortem fingerprint impressions from decedents is a manual and labor-intensive process. 3D scanners are potentially an important tool to help forensic scientists address the challenges of postmortem fingerprint recovery due to the contactless scanning capabilities, as well as the ability to scan complex surfaces and capture scale. This NIJ-supported study evaluated the potential for using a contactless, 3D fingerprint scanner to capture examination-quality postmortem fingerprints and facilitate rapid identification of the deceased.

#### [Evidential Value of Particle Combination Profiles on Common Items of Evidence](#)

This project used the analytical tools and statistical methods developed in previous research funded by NIJ to measure the evidential value of very small particle (VSP) profiles found on four common types of

The goal of the Laboratories and Educators Alliance Program (LEAP) is to facilitate collaborative research between academia and forensic science laboratories. This joint effort between the American Society of Crime Lab Directors (ASCLD) and the Council of Forensic Science Educators (COFSE) identifies forensic science needs and provides a platform for laboratories, researchers, and students to seek projects aligning with their mutual research capabilities.

Laboratories	Academia
Expands the research climate within the laboratory, leading to meaningful contributions to forensic science practices.	Promotes impactful research by providing a list of forensic science needs and research interests that can lead to future collaborations.
Provides educational opportunities, such as conference presentations and guest lectures.	Enriches the knowledge base of university faculty with limited or no prior forensic laboratory experience.
Supports the laboratory through hosting student interns to assist in validation and evaluation projects.	Enhances academic achievements through the valuable internship experiences provided to students.
Facilitates the connection between the laboratory and university programs, potentially assisting with future hiring actions and research needs.	Streamlines vital connections and collaborations between universities and forensic science laboratories as required for accreditation.

**Solicitation Announcement**  
 NIJ Research and Evaluation on Drugs and Crime FY2018  
 Solicitation:  
<https://nij.gov/funding/Documents/solicitations/NIJ-2018-13682.pdf>  
 Applications Due: April 25, 2018

NIJ's drugs and crime portfolio supports research on law enforcement efforts to deter, investigate, prosecute, and address illegal drug trafficking, markets, and use. This FY2018 solicitation will seek investigator-initiated proposals to conduct applied research on evidence-based tools, protocols, and policies for State, local and tribal jurisdictions. The two drug priorities are: 1) opioid-related criminal investigation, prosecution, drug intelligence, and community surveillance; and 2) illegal marijuana markets and drug-related violent crime. Opioid research proposals should address narcotics law enforcement, forensic science, and/or medicolegal death investigations; and opioids include heroin, fentanyl, diverted pharmaceuticals, synthetic drugs, and analogues.

See The National Institute of Justice's Role in the Strategy to Combat Heroin and Other Opioids at <https://www.nij.gov/topics/drugs/Pages/nij-role-in-the-stategy-to-combat-heroin-and-other-opioids.aspx>

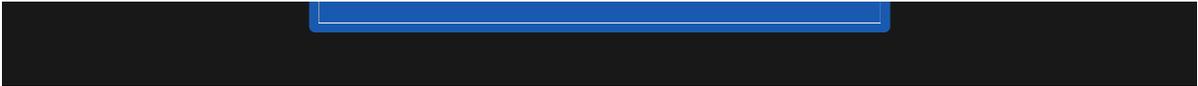

General information on applying for NIJ awards can be found at [www.nij.gov/funding/Pages/welcome.aspx](http://www.nij.gov/funding/Pages/welcome.aspx). Answers to frequently asked questions that may assist applicants are posted at [www.nij.gov/funding/Pages/faqs.aspx](http://www.nij.gov/funding/Pages/faqs.aspx). For assistance with any other requirements of this solicitation (NIJ-2018-13682): toll-free at 1-800-851-3420; via TTY at 301-240-6310 (hearing impaired only); email [grants@ncjrs.gov](mailto:grants@ncjrs.gov); fax to 301-240-5830; or web chat at <https://webcontact.ncjrs.gov/ncjchat/chat.jsp>.

physical evidence: handguns, cell phones, drug packaging, and ski masks.

[Method Development and Validation of Toolmark Imaging, Virtual Casings Comparison, and In-Lab Verification using a GelSight-Based Three Dimensional Imaging and Analysis](#)

Stemming from a previous project that developed a 3D surface topography imaging and analysis system for casings based on the GelSight scanning technology and custom feature-based image comparison, this NIJ-supported project aimed 1) to develop the ability to scan and compare firing pin impressions; 2) to examine the use of the imaging and analysis technology in a live lab experiment; and 3) to investigate Virtual Microscopy, the use of measured 3D surface topographics as a substitute for physical casings.
