

American Society of Crime Lab Directors

"THE CRIME LAB MINUTE" NEWSLETTER

Colleagues,

I would like to welcome many of you to Dallas, Texas for the 2017 ASCLD Symposium! President Elect Wickenheiser and the symposium planning committee have planned a great week of informative talks, great presentations, and fun events. I look forward to seeing many of you throughout the week and thank you so much to the symposium planning team for all your hard work throughout the year to make this symposium possible.

This is my last Crime Lab Minute as President, and I just wanted to take a moment and thank the current Board of Directors, Executive Director Jean Stover, and Administrative Assistant Ramona Robertson for all the great work that has been accomplished over the year. It's been the highlight of my career to serve you as President of this organization and as a team I believe this Board of Directors has accomplished some great things this year. I love this organization and think it represents the very best of forensic science. I know I leave this position in great hands with President Elect Ray Wickenheiser and I can't wait to see what the next Board accomplishes. We have great people.

Thank you from the bottom of my heart to everyone who has served this organization throughout the years.

Kindest regards,
Jeremy Triplett

ASCLD Scholarship Deadline Approaching

ASCLD awards annual scholarships to undergraduate and graduate students in forensic science. Scholarships are generally awarded in the amount of \$1,000; however, the number and dollar amount of scholarships will be determined annually after the availability of funds is determined. Applications are reviewed and ranked according to the following criteria:

Overall scholastic record

Scholastic record in forensic science coursework

Motivation or commitment to a forensic science career

Personal statement

Faculty/Academic advisor recommendation

The first due date in the application process is April 15th. For more information and to obtain a copy of the application please go to <http://www.asclcd.org/nominations/>.

ASCLD Member Opportunity- American Board of Criminalistics

The American Board of Criminalistics (ABC) is looking for an ASCLD member who will represent the operations and interest of the American Board of Criminalistics-Board of Directors. Candidates must be ABC certified and should possess accreditation experience. Broad experience in forensic science is preferred. Commitment to the ABC includes about five hours a month, a monthly teleconference, and two,

in-person meetings a year. The in-person meetings are each scheduled over a weekend and a small stipend is paid to cover some expenses.

If you are interested or have any questions please contact Mr. Chris Taylor, ABC Vice President and current ASCLD Representative at taylorce8@att.net. Please provide a CV for the Board to review. A short interview of candidates may occur at a future ABC Board Meeting.

ASCLD Members: we are asking for you to send the following notice regarding a University Research and Forensic Lab collaborative workshop out to your University contacts:

Workshop - Arbinger - Developing and Implementing and Outward Mindset

Cameron Cozzens (Arbinger Institute) is conducting an 8 hour workshop on May 1 to assist leaders in forensic organizations facilitate change. From the authors of the international best-selling books Leadership and Self-Deception, The Anatomy of Peace, and The Outward Mindset comes the workshop that is helping government and corporate leaders dramatically transform their culture. In this workshop, The Arbinger Institute helps resolve the organizational problems—including weak individual performance, lack of accountability, ineffective leadership, poor teamwork, interpersonal conflict and functional silos—that plague many organizations, hurting their results. The root cause of most organizational problems is that employees often unknowingly work with an “inward mindset”—focused inwardly on their own, personal objectives. www.arbinger.com

Workshop - NIJ Research

Bridging the Gap Between Researchers and Practicing Forensic Scientists: The Need for Collaboration The “Forensic Science Research Incubator”

On Sunday, April 30, NIJ is conducting an 8 hour Workshop at the ASCLD Annual Meeting to bring together University Researchers and Forensic Lab Leaders to facilitate research. Grant funding opportunities will also be presented. This workshop is an excellent opportunity to meet face to face to share ideas and forge partnerships. This meeting will also provide an opportunity to learn about the ASCLD Forensic Research initiative. Please check out the specifics at:

<http://www.ascldsymposium.com/events-1/i546th2e508/Bridging-the-Gap-Between-Researchers-and-Practicing-Forensic-Scientists-The-Need-for-Collaboration>

The meeting general information and registration is: <http://www.ascldsymposium.com/> and consider attending.

Workshop NIJ Grant Managers

NIJ Programs for Forensic Laboratories

On Monday, May 1, NIJ is conducting a 4 hour Workshop at the ASCLD Annual Meeting specifically tailored to Grant Managers. This workshop will cover grant requirements and reporting, formula and competitive grants and include recommendations to write a successful competitive grant application. Specifics for this workshop can be found at: <http://www.ascldsymposium.com/events-2/i54cmq0k133/NIJ-Programs-for-Forensic-Laboratories>

<https://www.ncjrs.gov/pdffiles1/nij/grants/250467.pdf>

Citrate Content of Bone: A potential Measure of Post Mortem Interval

A constant concern for forensic practitioners is the determination of the post-mortem interval (PMI) in questioned death cases. A number of methods have been tried to better determine PMI, but all have proven

problematic. NIJ-supported researchers at the SUNY Brockport Research Foundation evaluated the citrate method for determining PMI based on a 2010 study that indicated citrate content in bone could be potentially useful in estimating PMI. The researchers intend to make the interface available free online.

Microspectrophotometry of Fibers: Advances in Analysis and Interpretation

Microspectrophotometry is a standard forensic laboratory technique for the comparison of fibers, however, there are concerns about its discriminating power and significance in a field that is moving toward statistical interpretation of data. In this NIJ-supported project, researchers with the forensic laboratory Microtrace conducted an extensive review of microspectrophotometry to present investigators with a context for relating spectral differences to colorant concentrations in fibers and illustrate cases in which similar, but different, fiber populations could not be discriminated.

Forensic Crime Lab Strategic Business Plan

We develop and write Strategic Business Plans for forensic crime labs. Here are the type of questions and challenges we can help answer and overcome:

- Multiple Crime Lab Consolidation
- Medical Examiner Office and Crime Lab Mergers
- Multi Agency Regional Partnerships
- New Lab Considerations; Equipment Planning, Operational Cost Planning, Workload Measurement, Staff Planning
- New Equipment Forecasting and Funding Justification
- Operational Cost Forecasting
- Long Term Budget Forecasting

We can, together, develop a Forensic Crime Lab Strategy Plan that will make your lab more efficient, work within your operational budget, and deliver flawless work.

FORESIGHT 20./20

The American Society of Crime Laboratory Directors (ASCLD) has received funding from the Laura and John Arnold Foundation to develop software that will transfer data from forensic Laboratory Information Management Systems (LIMS) to FORESIGHT, a business quantitative process tailored to forensic laboratories

The goal of the project, called FORESIGHT 20/20, will be to allow laboratories to easily upload business-relevant information from their individual LIMS to the FORESIGHT project, hosted at West Virginia University.

Software development and installations for JusticeTrax Alpha labs is progressing. The software provides a dashboard of the labs' own stats and FORESIGHT stats, among other information. The information, formatting, and interface may vary somewhat by vendor.

Contact has been made with Porter Lee and connections are being created for TOMIKO to test software for that vendor. Similar set up work is being done with STaCS DNA. A conference call was held with StarLIMS to

NFSTC is now offering online proficiency testing in crime scene investigation to agencies across the globe. After the Fact has been used as the competency standard since 2011 and is a cost-effective training tool. Assessments are \$250 and available at www.csi-skills.com.

OSAC Subcommittees

orient them to the project. Forensic Advantage has been contacted twice with no response; their participation as a vendor has been shelved until and unless they respond. The only Forensic Advantage Alpha lab, Las Vegas PD, has been contacted and a conference call is scheduled for 29 MAR to provide some advice and assistance to them so they can participate in FORESIGHT 20/20 to the extent possible.

The FORESIGHT Users meeting is scheduled for April 30 and a plenary presentation on FORESIGHT 20/20 is scheduled for the ASCLD meeting in May.

Foresight 20/20

Just Science Podcast Interviews

RTI International in partnership with the Forensic Technology Center of Excellence, a program of the National Institute of Justice, Department of Justice, is producing a podcast called "Just Science". The Just Science podcast is designed to reach a broad audience of forensic scientists and other professionals who collaborate with the forensic science community.

As part of the podcast series, RTI would like to interview any ASCLD members who would like to share interesting or unusual criminal cases, now closed or adjudicated, where forensic science was critical to the outcome of the case. Our goal is to provide the audience with a positive view of the importance of forensic science in criminal investigations. The timing of the cases is not important, although preference will be given to cases involving some personal experience and that can be the subject of an in-depth conversation. The audio only recording usually takes 40 to 60 minutes, depending on the content, and all disciplines are welcome. We would like to do the recordings during the ASCLD annual symposium in Dallas, Texas.

The available dates are Tuesday, May 2nd and Wednesday, May 3rd, and we can accommodate your schedule. Please e-mail Lauren Mangum from RTI International at lmangum@rti.org with a short overview of the case and methods used. This is a great way to disseminate your, or your crime laboratory's work to a wide audience, hopefully sparking conversations, new ideas, and inspiring others within the field to approach cases in alternative ways. You can change the position of the caption and set styles in the block's settings tab.

Featured Article:

His name was Wilmer Souder. A physicist at the National Bureau of Standards, now known as the National Institute of Standards and Technology (NIST), Souder played an important role in the early days of forensic science. He helped send countless murderers, bootleggers, gangsters and thieves to prison, and he kept such a low profile partly out of concern for his and his family's safety. Perhaps as a result, he was not long remembered for his forensic work, and his influence on the developing field of forensic science was not as great as it might have been.

NIST Library just finished scanning Souder's nine notebooks and has made them available for anyone to view via the NIST Digital Archives:

Establishment of an Office of Forensic Sciences and a Forensic Science Board Within the Department of Justice

Revision 2/14/17

http://thecfso.org/advocacy/20170214_CFSO_OFS_Proposal_Rev.pdf

Formed in 2000, CFSO is an association of six forensic science professional organizations: American Academy of Forensic Sciences; American Society of Crime Lab Directors; International Association for Identification; International Association of Forensic Nurses; National Association of Medical Examiners; and Society of Forensic Toxicologists - American Board of Forensic Toxicology.

These professional organizations together represent more than 21,000 forensic science professionals across the United States.

The mission of the CFSO is to speak with a single forensic science voice in matters of mutual interest to its member organizations, to influence public policy at the national level and to make a compelling case for greater federal funding for public crime laboratories and medical examiner offices. The primary focus of the CFSO is local, state and national policymakers, as well as the United States Congress.
