[A Message from Past President](#) [Jody Wolf](#)

Greetings Colleagues,

Last week President Jeremy Triplett, Past President Brady Mills, Past President Barry Fisher, Executive Director Jean Stover, Director Timothy Scanlan, and I traveled to North Carolina to meet with our partners, RTI International, for the National Forensic Science Academy (NFSA) Working Group meeting. This was the first meeting of the Working Group that will be collaborating on establishing the core curricula, program structure, credentialing model, and the Board of Directors composition. Working Group members included representatives from ASCLD, RTI International, West Virginia University, Florida International University, Duquesne University, National Association of Medical Examiners, International Association for Identification, and the Institute for Credible Leadership Development. It was a very productive meeting and we are off to a great start towards achieving our goals for the first phase of this project.

As the Chair for the NFSA ASCLD Committee, I'd like to solicit member involvement to help work on several deliverables associated with this initiative. Please contact me at jody.wolf@phoenix.gov if you are interested in participating on this committee. This committee will be very busy and active participation is necessary in order to adhere to our timeline.

I'm looking forward to hearing from members who are interested in working on this committee!

I hope you all have a great week!

Kindest Regards,

Jody Wolf, Past President

Forensic Science Policy & Management is dedicated to improving the effectiveness, efficiency, quality, and operations of forensic science laboratories as well as to the education and training of forensic scientists. In addition, the journal explores the government and institutional policies that affect the practice and management of forensic science. Forensic Science Policy & Management Volume 7, Issues 3-4 are now available at www.tandfonline.com/toc/ufpm20/current. New articles include:

- Leadership Decisions Influencing Medicolegal Death Investigation: "We wear a lot of hats." [Stacy A. Drake](#), [Eileen Giardino](#), [Angelo Giardino](#) & [Kurt Nolte](#)

- Up from "Arts and Crafts": Division of Labor in Forensic Science Laboratories, [William P. McAndrew](#) & [M. Garrett Roth](#).

Access to the journal comes free with your ASCLD membership. At the journal website, look for the "Sign in" at the top of the page. Submissions are requested from professionals, academics, scholars, and policy makers from science, law, and government. Information for authors can be found by clicking "Submit" at the left of the journal webpage. Questions about the journal can be sent to max@forensicintelligence.us or siegel.jay@gmail.com.

Forensic Training

John Collins with the **Forensic Foundations Group** is announcing the last of 3 online Professional Orientation Schools for New Crime Lab Scientists. Maximum 20 students per school.

Each school is comprised of 8, 2-hour online sessions over 4 weeks with a final examination. Please visit www.forensicfoundations.com/scheduled-workshops to view the schedule and/or register. Students should first register for free as a "Friend of the Group" to qualify for the discounted \$245 registration fee. Please call John at [\(517\) 803-4063](tel:5178034063) if you have any questions.

Houston Forensic Science Center

HFSC is a local government corporation created to provide independent forensic services to law enforcement agencies, primarily the Houston Police Department, and other judicial entities. We welcome you to explore our forensic services, learn more about the Center, invite employment opportunities or contact us.

The Houston Forensic Science Center has rescheduled the following two courses to take place later on this year:

<u>Title</u>	<u>Date</u>
Intermediate Latent Print Comparison	May 23 2016
Palm Print Comparison Course	Jun 15 2016
Firearm Examination for the NonExaminer	Jun 20 2016
Crime Scene investigation	Jul 11 2016
Summer Series Educational Seminars for Science Teachers	Jul 19 2016
Summer Series Educational Seminars for Science Teachers - Part 2	Aug 03 2016
Palm Print Comparison Course	Nov 02 2016
Forensic Anthropology: Bone Identification	Sep 15 2016
IAI Crime Scene Certification Exam Preparation: CCSI and CCSA Levels	Sep 19 2016
IAI Crime Scene Certification Exam Preparation: CSCSA Level	Dec 12 2016

The Law Enforcement Innovation Center (LEIC) is an agency of the University of Tennessee Institute for Public Service at the University of Tennessee.

Formed in 1997, LEIC is a leading training and technical assistance provider for the law enforcement community across the nation. Over the past 15 years, more than 30,000 law enforcement officers, other criminal justice practitioners, public safety workers, public school personnel, and community members have completed our training and educational programs. <http://leic.tennessee.edu/>

Ron Smith & Associates Training **National Forensic Quality Manager Training Academy**

It is truly amazing that, until now, there has never been a national training academy specifically designed for Quality Managers. Forensic Quality Managers have been expected to learn from "on the job" training that they may receive from a variety of sources, but none of this training has been consistent in the industry. Organizations like the Association of Forensic Quality Assurance Managers have been huge in taking up the mantle of providing various workshops and classes, but it was never intended to take the place of a complete training program. With forensics being under such intense scrutiny these days, agencies who perform forensic analysis must ensure that their work is performed under the guiding principles and standards which are now becoming more clearly defined each day. We, in the forensic industry, have not embraced Quality Management training as aggressively as we should.

Ron Smith & Associates, Inc. is known as one of the premier forensic training companies in the world. Our teams of subject matter experts and support staff have successfully designed and offered hundreds upon hundreds of highly sought after training opportunities all across the United States and abroad. RS&A is now ready to take on the challenge of building a National Forensic Quality Manager Training Academy which will soon become the cornerstone of forensic training in this very critical area.

June 20, 2016 through July 1, 2016 in Pearl, MS. Academy tuition is \$2,500.00 with only 25 seats available. Click [here](#) for complete academy details and to complete an academy application today!

National Footwear & Tire Track Training Academy

Coming Fall 2016

RS&A now offers a Footwear and Tire Track Training Academy which includes 4 weeks of footwear examination training followed by 2 weeks of tire track examination training. Applicants can elect to complete the entire 6 week footwear and tire track academy or break it up and choose only the 4 weeks of footwear training or the 2 weeks of tire track training. The academy graduates of this 6 week program will learn the skills necessary to complete supervised footwear and tire track casework and will be ready to apply for a IAI Footwear Certification once time requirements have been met. It is scheduled to begin Fall of 2016 in Hattiesburg, MS at the Camp Shelby Joint Forces Training Center. Only 20 academy applicants will be selected to attend. For the entire 6 week footwear and tire track academy the cost is set at \$11,250.00. The 4 week footwear only academy is set at \$7,500.00 and the 2 week tire track only academy is \$3,750.00. Cost includes academy instruction, room and board, and 3 meals per day according to training selection. Click [here](#) for complete details and to apply for admission today.

MAY 2016

Scientific Analysis (ACE-V): From the Laboratory to the Witness Stand
Location: Bowling Green, OH
Class Dates: 05-16-2016 thru 05-20-2016
Tuition: \$600.00 | Hours: 40

News Around the Globe

New state crime lab opens in Billings

After years of backlogged crime analysis and testing issues, the Montana Legislature approved a new lab in Billings last year hoping it will help ease investigative delays. The Montana Department of Justice and Attorney General Tim Fox on Thursday hosted a tour of the new facility located on the second floor of the Billings Clinic Diabetes, Endocrinology, and Metabolism Center.

The lab started handling cases last week. The new lab will help with cases of drug identification, which was taking up to eight months to process. Other tests such as DNA, firearms analysis and finger prints must still be processed at the main State Crime Lab in Missoula.

Harris County crime lab faces heavy backlog of DNA cases

Backlog triggers debate over DNA testing priorities
 Expanded testing for property crimes has helped create a backlog of more than 4,600 DNA cases in the Harris County crime lab, straining its ability to complete the processing of such evidence for sexual assaults and even homicide cases in a timely manner.

Forensic Management Academy

Those interested in improving their individual and organizational knowledge of contemporary business practice as it applies to forensics should apply now, space is limited. Training will occur August 28-September 2, 2016 in Pittsburgh, PA at the Hyatt Regency Pittsburgh Airport. Click [here](#) for registration and additional information.

The Forensic Technology Center of Excellence

The NIJ Forensic Technology Center of Excellence (FTCoE) is committed to improving the practice and strengthening the impact of forensic science through rigorous technology corroboration, evaluation, and adoption; effective knowledge transfer and education; and comprehensive dissemination of best practices and guidelines to agencies dedicated to combating crime.

NEW LIVE Microbial Forensics Webinar Series!

This will be the second webinar in the Microbial Forensics Webinar Series.

Basics of Microbiology as applied to Microbial Forensics

May 18th, 2016 - 1pm - 3pm EDT

Dr. Bruce Budowle, of the University of North Texas Health Science Center, will present on microbiology, pathogens, human microbiome, and genetic engineering/synthetic biology. Participants will gain a better understanding of microbiology as applied to microbial forensics and the role it plays in combating bioterrorism.

On-Demand (Approximately 75 Minutes) Click [here](#) for registration information.

Cambridge Healthtech Institute's Inaugural DNA Forensics

Exploring New Frontiers in Forensic DNA Investigation

August 23-24, 2016 | Grand Hyatt Hotel | Washington, DC

Advances in DNA profiling technologies are enabling faster and more accurate results, in some cases moving procedures from the lab to the crime scene. Emerging tools such as next-generation sequencing are also creating new possibilities in forensic DNA investigation, but with that comes unfamiliar scientific and legal implications.

Cambridge Healthtech Institute's Inaugural DNA Forensics event will examine new technologies, changing policies, and trends in forensic DNA investigations. Special focus will be given to next-generation sequencing (NGS), including statistical analysis and interpretation of DNA profiles. Optimizing extraction techniques and isolation will also be addressed with an emphasis on challenging samples. Overall, this event aims to address existing bottlenecks while introducing solutions and new concepts in the DNA identification field.

Shimadzu's triple quad GCMS-TQ8040, providing exceptional sensitivity, selectivity, and specificity for detection and quantitation of targeted drugs in the presence of background interferences, is the most powerful choice for your toxicological applications. It enables the analysis of more than 400 compounds in one run, and features automatic method creation, scan/SIM acquisition mode, and an MRM optimization tool.

The Smart Forensic Database includes hundreds of compounds with optimized transitions and collision energies, CAS registry numbers and retention indices (RI). The database supports simultaneous high-sensitivity analysis of samples using GC-MS/MS, eliminating the need to configure complicated analysis conditions.
