Welcome home. It was a great week in Dallas, TX at the 44th Annual ASCLD Symposium. A huge thank-you to those who attended and especially to those who shared their expertise through our Leadership Academy, workshops and presentations. We continue to be our own best resource. For those who missed, we had a great time, so we want to see you in Atlanta for 2018. Our Dallas meeting marks one of our most successful conferences to date with 510 registered attendees. We welcomed keynote speakers crime survivor Natasha Alexenko, U.S. Attorney John Parker, professional leadership expert speakers Jim Ferrell from Arbinger Institute and Jimmy Capra from Front Line Leadership, and firearms expert Luke Haag for an incredible reconstruction of the JFK shooting at Dealey Plaza Museum.

Our theme for this year’s meeting was “Continuous Improvement: Leading through Continuous Learning”. Our goal was to give you innovative techniques to mentor and inspire employees by providing actionable tools and transportable information that could be directly applied to improve your operation. With all the positive comments we received, I feel we went a long way towards meeting that goal. The remaining piece is you, bringing all that great stuff home and putting it into action.

I cannot thank outgoing President Jeremy Triplett, Past President Jody Wolf and Board Member Adam Becnel enough for their outstanding service. They have definitely moved ASCLD forward with great leadership and programs.

As your new president, I am very excited, humbled and honored to serve you as your representative. This promises to be a challenging year filled with new opportunity to work together in our mission to aspire to “Excellence through leadership in forensic science management”.

ASCLD Scholarship Deadline Approaching

ASCLD awards annual scholarships to undergraduate and graduate students in forensic science. Scholarships are generally awarded in the amount of $1,000; however, the number and dollar amount of scholarships will be determined annually after the availability of funds is determined. Applications are reviewed and ranked according to the following criteria:

- Overall scholastic record
- Scholastic record in forensic science coursework
- Motivation or commitment to a forensic science career
- Personal statement
- Faculty/Academic advisor recommendation

The first due date in the application process is April 15th. For more information and to obtain a copy of the application please go to http://www.ascld.org/nominations/.
The American Board of Criminalistics (ABC) is looking for an ASCLD member who will represent the operations and interest of the American Board of Criminalistics-Board of Directors. Candidates must be ABC certified and should possess accreditation experience. Broad experience in forensic science is preferred. Commitment to the ABC includes about five hours a month, a monthly teleconference, and two, in-person meetings a year. The in-person meetings are each scheduled over a weekend and a small stipend is paid to cover some expenses.

If you are interested or have any questions please contact Mr. Chris Taylor, ABC Vice President and current ASCLD Representative at taylorce8@att.net. Please provide a CV for the Board to review. A short interview of candidates may occur at a future ABC Board Meeting.

Forensic Science Research Digest Volume 1, Issue 2, March 2017

Solicitation Deadlines Extended
NIJ has extended the deadlines for the below solicitation:

Apply now! Funding is available for:

- FY 2017 Sexual Assault Forensic Evidence-Inventory, Tracking, and Reporting Program (SAFE-ITR) Application deadline: April 28, 2017
  Download the solicitation (pdf, 38 pages)

https://www.ncjrs.gov/pdffiles1/nij/250472.pdf

- Lab Manager, Sorenson Forensics, Salt Lake City, Expires: August 2, 2017
- DNA Analyst I & II, Sorenson Forensics, Salt Lake City, Expires: August 2, 2017
- DNA Technician, Sorenson Forensics, Salt Lake City, Expires: August 2, 2017
- Serologist, Sorenson Forensics, Salt Lake City, Expires: August 2, 2017
Citrate Content of Bone: A potential Measure of Post Mortem Interval

A constant concern for forensic practitioners is the determination of the post-mortem interval (PMI) in questioned death cases. A number of methods have been tried to better determine PMI, but all have proven problematic. NIJ-supported researchers at the SUNY Brockport Research Foundation evaluated the citrate method for determining PMI based on a 2010 study that indicated citrate content in bone could be potentially useful in estimating PMI. The researchers intend to make the interface available free online.

Microspectrophotometry of Fibers: Advances in Analysis and Interpretation

Microspectrophotometry is a standard forensic laboratory technique for the comparison of fibers, however, there are concerns about its discriminating power and significance in a field that is moving toward statistical interpretation of data. In this NIJ-supported project, researchers with the forensic laboratory Microtrace conducted an extensive review of microspectrophotometry to present investigators with a context for relating spectral differences to colorant concentrations in fibers and illustrate cases in which similar, but different, fiber populations could not be discriminated.

We develop and write Strategic Business Plans for forensic crime labs. Here are the type of questions and challenges we can help answer and overcome:

- Multiple Crime Lab Consolidation
- Medical Examiner Office and Crime Lab Mergers
- Multi Agency Regional Partnerships
- New Lab Considerations; Equipment Planning, Operational Cost Planning, Workload Measurement, Staff Planning, New Equipment Forecasting and Funding Justification
- Operational Cost Forecasting
- Long Term Budget Forecasting

We can, together, develop a Forensic Crime Lab Strategy Plan that will make your lab more efficient, work within your operational budget, and deliver flawless work.

- cyber security, jntuk, kakinada, Expires: June 15, 2017
- Crime Scene Investigator, Houston Forensic Science Center, Houston, TX, Expires: June 30, 2017
- Quality Specialist, Houston Forensic Science Center, Houston, TX, Expires: May 31, 2017
- Chief Operations Officer, Houston Forensic Science Center, Houston Forensic Science Center, Expires: May 12, 2017
- Forensic Technical Leader, GenQuest DNA Laboratory, Sparks, Nevada, Expires: May 31, 2017
- Forensic Analyst – Biology, Houston Forensic Science Center, Houston, TX, Expires: May 12, 2017
- Forensic Chemistry Supervisor (Toxicology), Austin Texas Police Department, Austin Texas, Expires: May 15, 2017
- Chief Toxicologist, Cuyahoga County, Cleveland, OH, Expires: May 15, 2017
- Criminalist, County of Los Angeles – Medical Examiner Coroner, Los Angeles, CA, Expires: June 9, 2017
- Physician Specialist, County of Los Angeles, Los Angeles, CA, Expires: May 19, 2017
- Chief Forensic Laboratories, Los Angeles County – Medical Examiner- Coroner, Los Angeles, CA, Expires: May 17, 2017
The American Society of Crime Laboratory Directors (ASCLD) has received funding from the Laura and John Arnold Foundation to develop software that will transfer data from forensic Laboratory Information Management Systems (LIMS) to FORESIGHT, a business quantitative process tailored to forensic laboratories.

The goal of the project, called FORESIGHT 20/20, will be to allow laboratories to easily upload business-relevant information from their individual LIMS to the FORESIGHT project, hosted at West Virginia University.

Software development and installations for JusticeTrax Alpha labs is progressing. The software provides a dashboard of the labs’ own stats and FORESIGHT stats, among other information. The information, formatting, and interface may vary somewhat by vendor.

Contact has been made with Porter Lee and connections are being created for TOMIKO to test software for that vendor. Similar set up work is being done with STaCS DNA. A conference call was held with StarLIMS to orient them to the project. Forensic Advantage has been contacted twice with no response; their participation as a vendor has been shelved until and unless they respond. The only Forensic Advantage Alpha lab, Las Vegas PD, has been contacted and a conference call is scheduled for 29 MAR to provide some advice and assistance to them so they can participate in FORESIGHT 20/20 to the extent possible.

The FORESIGHT Users meeting is scheduled for April 30 and a plenary presentation on FORESIGHT 20/20 is scheduled for the ASCLD meeting in May.

Just Science Podcast Interviews

RTI International in partnership with the Forensic Technology Center of Excellence, a program of the National Institute of Justice, Department of Justice, is producing a podcast called “Just Science”. The Just Science podcast is designed to reach a broad audience of forensic scientists and other professionals who collaborate with the forensic science community.

As part of the podcast series, RTI would like to interview any ASCLD members who would like to share interesting or unusual criminal cases, now closed or adjudicated, where forensic science was critical to the outcome of the case. Our goal is to provide the audience with a positive view of the importance of forensic science in criminal investigations. The timing of the cases is not

NFSTC News

NFSTC is now offering online proficiency testing in crime scene investigation to agencies across the globe. After the Fact has been used as the competency standard since 2011 and is a cost-effective training tool. Assessments are $250 and available at www.csi-skills.com.

E30.01 Criminalistics

The following work items are underway:
important, although preference will be given
to cases involving some personal
experience and that can be the subject of an
in-depth conversation. The audio only
recording usually takes 40 to 60 minutes,
depending on the content, and all disciplines
are welcome. We would like to do the
recordings during the ASCLD annual
symposium in Dallas, Texas.

The available dates are Tuesday, May
2nd and Wednesday, May 3rd, and we can
accommodate your schedule. Please e-mail
Lauren Mangum from RTI International
at lmangum@rti.org with a short overview of
the case and methods used. This is a great
way to disseminate your, or your crime
laboratory’s work to a wide audience,
hopefully sparking conversations, new
ideas, and inspiring others within the field to
approach cases in alternative ways.
You can change the position of the caption
and set styles in the block’s settings tab.

Formed in 2000, CFSO is an association of six forensic science professional organizations: American Academy of Forensic Sciences; American Society of Crime Lab Directors; International Association for Identification; International Association of Forensic Nurses; National Association of Medical Examiners; and Society of Forensic Toxicologists - American Board of Forensic Toxicology.

These professional organizations together represent more than 21,000 forensic science professionals across the United States.

The mission of the CFSO is to speak with a single forensic science voice in matters of mutual interest to its member organizations, to influence public policy at the national level and to make a compelling case for greater federal funding for public crime laboratories and medical examiner offices. The primary focus of the CFSO is local, state and national policymakers, as well as the United States Congress.
