#### **President's Message**

Announcing the 2020 ASCLD Symposium location: Denver, Colorado!

Colleagues,

Over the summer, Executive Director Jean Stover, Past-President Jody Wolf, President-Elect Ray Wickenheiser, and I kept busy working on future ASCLD symposium dates and locations.

ASCLD tries to hold symposia in locations that are interesting, entertaining, and conducive to travel logistics and budgets. Additionally, it's financially advantageous for attendees that we stay several years ahead in order to ensure the best per diem rates for lodging. As you hopefully know, we also poll symposium attendees each year about locations in which you would like to see future symposia.

In response to member input, this year we considered several cities including San Diego, Denver, Philadelphia, and Boston. Ultimately, the executive Board settled on hosting the 2020 ASCLD Symposium at the Hyatt Regency Denver at Colorado Convention Center for the workshop dates of March 28-29 and the plenary session dates of March 30 – April 2. This hotel offered the best package of per diem rates and attendee benefits. Additionally, the hotel is firmly planted in the heart of downtown Denver, and offers a great experience.

Mark your calendars! We look forward to seeing you in Denver in 2020!

Have an amazing week.

Kindest regards,  
Jeremy Triplett

---

#### **ASCLD Responds to the PCAST Report on Forensic Science**

Last Friday, the ASCLD Board of Directors released an official response to the report by the President's Council of Advisors on Science and Technology, titled "Forensic Science in Criminal Courts: Ensuring Scientific Validity of Feature-Comparison Methods."

The statement was distributed to PCAST staff and will be provided to all members of PCAST.

To view the statement by the Board of Directors, visit: <http://www.asclcd.org/wp-content/uploads/2016/10/ASCLD-Statement-on-PCAST-Report.pdf>

### In Memory

It is with sadness that ASCLD is notifying its membership of the passing of emeritus member, Travis Owen. Mr. Owen passed away on September 16 at the age of 80. Mr. Owen was the third lab director at the Louisiana State Police Crime Lab in the early 1970s. He left there to start the Acadiana Crime Lab. He was a part of the first group of lab directors invited to Quantico, VA by the director of the FBI. This group eventually formed the American Society of Crime Laboratory Directors (ASCLD). In 1981, he was elected to the first Board of Directors for ASCLD/LAB as the very first Executive Secretary of that organization. Forensics has lost one of the forefathers in our field.

### Louisiana Flood Relief Fund

Last month Louisiana suffered the worst U.S. natural disaster since hurricane Sandy in 2012. Countless people lost everything they owned. After reaching out to crime lab directors in Louisiana, we have identified 15 crime lab personnel from several labs who suffered significant losses.

ASCLD in partnership with the Louisiana Association of Forensic Scientists has established a financial relief fund where you can donate directly to the crime lab employees who were affected. Please consider donating a few dollars to help those who suffered losses during this time.

If you would like to contribute to the relief fund, you may mail a check to the following address. (Note please indicate "Louisiana Flood Relief Fund" in the memo field.)

Louisiana Association of Forensic Scientists  
Attn: Cheryl Swearingen  
376 East Airport Ave.  
Baton Rouge, LA 70806

You may also contribute using a credit or debit card by contacting the LAFS Treasurer at [225 925-4937](tel:225-925-4937) or [225 229-9960](tel:225-229-9960).

Hello Everyone,

Marshall University Forensic Science is offering the DNA Technical Assistance Program (DNA TAP) again this year. Attached is the DNA TAP Information flyer and the associated DNA TAP Request Form should you have validation or evaluation needs. Beginning this week, a limited number of DNA TAP students are in training at the MU Forensic Science Center from now until May for their summer 2017 DNA TAP assignments. No assignments have been made at this time so please apply early this fall to have the best chance to be assigned a DNA TAP student.

Please feel free to call ([304-634-5263](tel:304-634-5263)) or email ([staton1@marshall.edu](mailto:staton1@marshall.edu)) should you have questions or wish to apply but need more information. If you are new to this program, I would be happy to set up a conference call with your group to discuss this further.

Also, please feel free to forward this email and its attachments to a colleague.

Thank you,  
Pam

## Research Reports

### NIJ Forensic Science R&D Reports for ASCLD Crime Lab Minute Vol 6

*These research reports have been submitted by the National Institute of Justice (NIJ) especially for their relevance to crime laboratory activities. ASCLD has not reviewed nor does it necessarily endorse the findings of this research.*

#### [For Comment: "National Best Practices for Sexual Assault Kits: A Multidisciplinary Approach"](#)

NIJ convened a working group of experts to develop recommendations for the accurate, timely and effective collection and processing of sexual assault evidence. The draft document, "National Best Practices for Sexual Assault Kits: A Multidisciplinary Approach," is available for public comment until September 2, 2016.

#### [Registration Open for Looking Ahead: the National Sexual Assault Policy Symposium](#)

Looking Ahead: The National Sexual Assault Policy Symposium, to be held September 8-9, 2016, supports efforts to solve sexual assault cases, provide justice to victims, and ultimately improve public health and public safety. This unprecedented event focuses on how the nation is moving forward and finding solutions to the complex issues that arise in testing sexual assault evidence. Register to attend soon; seating is limited.

#### [Identifying Missing Persons Through Legislation](#)

New York State Governor Cuomo recently signed Bill A10278, which will amend the executive law, section 838, in relation to the identification of unknown dead and missing persons. Specifically it creates a requirement that, upon receipt of unidentified remains, all New York county medical examiners and coroners will be required to report identifying information of those remains to the National Missing and Unidentified Persons System, NamUs.

#### [Using a Portable Mass Spectrometer to Analyze Crime Scene Evidence](#)

The work of NIJ-supported researchers from Virginia Commonwealth University, was recently featured by the *Chicago Tribune*. Their study focuses on the development of a smaller, more portable version of a mass spectrometer to allow faster and simpler analysis of crime scene evidence.

#### [Ballistics Toolmark Research Database](#)

The National Institute of Standards and Technology, with support from NIJ, created an open-access database to collect 3D models of bullets and cases. Now researchers can get the data they need to develop a variety of ballistics-matching algorithms.

#### [Forensic Science Research Evaluation Workshop - A Discussion on the Fundamentals of Research Design and an Evaluation of Available Literature](#)

This NIJ and National Science Foundation-supported workshop was formed to discuss the fundamentals of research design and the evaluation of the forensic science literature. The NCFCS recognized that forensic scientists and the OSACs would benefit from tools to help them assess the scientific literature in order to conform to higher scientific standards in critical thinking and laboratory performance. This publication is a resource for evaluating and elevating the research efforts in the forensic sciences and that it may be useful to OSAC members, advanced practitioners, and peer reviewers of the basics of research and evaluation of forensic science literature, as well as for Directors of Master of Forensic Science educational programs.

#### [Bath Salt-type Aminoketone Designer Drugs: Analytical and Synthetic Studies on Substituted Cathinones](#)

# COMMITTED CONNECTED FOCUSSED

Learn more about  
accreditation and training  
at [ascd-lab.org](http://ascd-lab.org)

The New Home of ASCLD/LAB

#### [ANSI-ASQ National Accreditation Board](#)

(ANAB) ANAB provides accreditation for ISO/IEC 17025 forensic test laboratories and ISO/IEC 17020 forensic inspection agencies and a wide variety of training, workshops, and academic programs.

#### [ASCLD-LAB Training](#)

Training classes to help forensic laboratory personnel understand the requirements of ISO/IEC 17025 General Requirements for the Competency of Testing and Calibration Laboratories.

#### [ASCLD/LAB-International Assessor Training Course for Testing Laboratories](#)

#### [ASCLD/LAB-International Assessor Training Course for Breath Alcohol Calibration](#)

#### [ASCLD/LAB-International Internal Auditor Training Course](#)

#### [ASCLD/LAB-International Preparation Course for Testing Laboratories](#)

Forensic laboratories face an ongoing problem of trying to analyze and identify “designer drugs” that, by definition, are being designed in clandestine drug laboratories to be structurally different than previous drugs. This NIJ-supported project from researchers at Auburn University focused on issues of resolution and discriminatory capabilities of forensic drug tests to increase the reliability and selectivity of such tests in identifying “new analytes of the so-called bath salt-type drugs.” The project provides the methodology and analytical data to allow investigators to “discriminate between those regioisomeric and isobaric molecules having the same molecular weight and major fragments of equivalent mass.” In summary, the research will better allow forensic experts to identify changing designer drugs.

#### [Modern Compendium of Microcrystal Tests for Illicit Drugs and Diverted Pharmaceuticals](#)

Intended for use by forensic scientists in the crime laboratory and researchers in the analytical chemistry laboratory, this NIJ-supported compendium contains information on 19 illicit or diverted pharmaceutical drugs for which microcrystal tests, using various reagents, have been previously developed.

#### [Utility of Postmortem X-ray Computed Tomography \(CT\) in Supplanting or Supplementing Medicolegal Autopsies](#)

This NIJ-supported study tested hypotheses regarding the use of postmortem X-ray computed tomography (CT) scans for the following types of cases: blunt force injuries, childhood traumatic fatalities, firearm injuries, and potential drug poisoning deaths. Comparison of autopsy to PMCT revealed neither modality is perfect, but both independently allow correct assessment of severity of injuries and cause of death.

#### [Computerized Reconstruction of Fragmentary Skeletal Remains for Purposes of Extracting Osteometric Measurements and Estimating MNI](#)

Identifying, matching and reconstructing human bone fragments from commingled mass graves, highly fragmentary individual burials, or in the wake of mass disasters, has long been a serious challenge to forensic anthropologists. In this NIJ-supported project, researchers at the University of Tennessee developed an osteological scene management tool in the form of software that enables investigators to quantify and reconstruct fragmentary human skeletal remains from three-dimensional surface files generated by computed-tomography or laser scans. The project expands the usefulness of the existing statistical atlases into the analysis of fragmentary and commingled remains and provides anthropologists with a means to quantify and reconstruct remains that are damaged or fragmentary, thereby enhancing analyses in challenging cases.

#### [Genomic Tools to Reduce Error in PMI Estimates Derived from Entomological Evidence](#)

Forensic entomologists routinely estimate the age of immature insects like blow flies in determining the time of death of crime victims. In this NIJ-supported project, researchers from Texas A&M University sought to improve the precision of estimates of blow fly age through the use of genetics – specifically the role and consequences of genetic variation in blow fly traits. While describing their work as “preliminary,” the researchers said it “has expanded our knowledge of the role of genetics in development time variation, showing that there is ample wild genetic variation that could potentially impact forensic predictions.”

## Ron Smith & Associates National Forensic Quality Manager Training Academy

March 20, 2017 - March 31, 2017 in Pearl, MS

It is truly amazing that, until now, there has never been a national training academy specifically designed for Quality Managers. Forensic Quality Managers have been expected to learn from "on the job" training that they may receive from a variety of sources, but none of this training has been consistent in the industry. Organizations like the Association of Forensic Quality Assurance Managers have been huge in taking up the mantle of providing various workshops and classes, but it was never intended to take the place of a complete training program. With forensics being under such intense scrutiny these days, agencies who perform forensic analysis must ensure that their work is performed under the guiding principles and standards which are now becoming more clearly defined each day. We, in the forensic should.

Ron Smith & Associates, Inc. is known as one of the premier forensic training companies in the world. Our teams of subject matter experts and support staff have successfully designed and offered hundreds upon hundreds of highly sought after training opportunities all across the United States and abroad. RS&A is now ready to take on the challenge of building a National Forensic Quality Manager Training Academy which will soon become the cornerstone of forensic training in this very critical area.

Academy tuition is \$2,500.00 with only 25 seats available.

Click here for complete academy details and to complete an academy application today! (Link to: [Ron Smith And Associates QMAcademy](#))

## National Footwear & Tire Track Training Academy

OCTOBER 3-14, 2016 (2 weeks Footwear)

OFF (October 17-28, 2016)

OCTOBER 31 - NOVEMBER 11, 2016 (2 weeks Tire Track)

RS&A now offers a Footwear and Tire Track Training Academy which includes 4 weeks of footwear examination training followed by 2 weeks of tire track examination training. Applicants can elect to complete the entire 6 week footwear and tire track academy or break it up and choose only the 4 weeks of footwear training or the 2 weeks of tire track training. The academy graduates of this 6 week program will learn the skills necessary to complete supervised footwear and tire track casework and will be ready to apply for a IAI Footwear Certification once time requirements have been met.

It is scheduled to begin September 5, 2016 in Hattiesburg, MS at the Camp Shelby Joint Forces Training Center. Only 20 academy applicants will be selected to attend.

The entire 6 week footwear and tire track academy the cost is set at \$11,250.00.

The 4 week footwear only academy is set at \$7,500.00.

The 2 week tire track only academy is \$3,750.00.

Cost includes academy instruction, room and board, and 3 meals per day according to training selection.

Click here for complete details and to apply for admission today. (Link to: <http://www.RonSmithandAssociates.com/Footwear>)

## Looking Ahead: The National Sexual Assault Policy Symposium

NIJ, through its Forensic Technology Center of Excellence, is hosting Looking Ahead: The National Sexual Assault Policy Symposium on September 8-9, 2016. The symposium focuses on how the nation is moving forward and finding solutions to the complex issues that arise in sexual assault cases and in testing

sexual assault evidence.

NIJ expects more than 350 high-level government officials from national, state, and local levels, along with decision-makers from law enforcement agencies, the legal community, and criminal justice coalitions from all 56 states and territories. This unprecedented event will support our nation's policymakers and practitioners as they drive future efforts to solve sexual assault cases, provide justice to victims, and ultimately improve public health and public safety.

Speakers include Pulitzer Prize winners T. Christian Miller and Ken Armstrong, co-authors of "An Unbelievable Story of Rape," Alicia O'Neill from TNT's Cold Justice: Sex Crimes, and victims advocate Natasha Alexenko, founder of Natasha's Justice Project.
