

AMERICAN SOCIETY OF CRIME LABORATORY DIRECTORS

“Excellence through leadership in forensic science management”

President's Message

During 2017-2018, the ASCLD Opioid Task Force (OTF) committee worked on a number of white papers, position statements, and informational documents for the ASCLD crime laboratories and stakeholders. The documents are published on the [ASCLD Opioid Resource Center](#) web page, and include topics such as analysis, safety, instrumentation, and networking resources. For example, as we and many of our first-responder and law enforcement partners implement Narcan®/Naloxone policies, the OTF recommended including availability of Narcan everywhere drug evidence may be handled: field, evidence areas, response vehicles, etc. Training and direct access to Narcan is especially vital for those that may come into contact with fentanyl and its analogs. [Message](#)

President's Corner

The ASB is currently accepting applications for openings in the consensus bodies. In order to maintain a specific balance across interest categories, the ASB is soliciting members only in these interest categories. [Message](#) [Click here for a detailed description of the Interest Categories.](#)

The application for membership can be downloaded from the Consensus Body informational area of the ASB website. Please complete the application by September 14, 2018 and send it to asb@aafs.org.

First Responders Video

A recent publication in *Journal of Analytical Toxicology* entitled: *The Opioid Epidemic: Moving Toward an Integrated, Holistic Analytical Response* is a valuable read to understand the “big picture” solutions needed in the opioid crisis (article link [here](#)). Also published this week are a live cast video (8/30/18 2PM EST) from the Department of Justice and Homeland Security on *Fentanyl: The Real Deal* (link [here](#)), and an earlier *Fentanyl Safety Recommendations for First Responders* ([link](#)).

FENTANYL[†]

SAFETY RECOMMENDATIONS FOR FIRST RESPONDERS

† For the purposes of this document, fentanyl, related substances, and synthetic opioids (hence after referred to as fentanyl[†]) includes fentanyl analogues (e.g., acetylfentanyl, acylfentanyl, carfentanyl, furanylfentanyl), novel synthetic opioids (e.g., U-47700), and other drugs that may be mixed with these substances.

- The abuse of drugs containing fentanyl[†] is killing Americans. Misinformation and inconsistent recommendations regarding fentanyl[†] have resulted in confusion in the first responder community.
- You as a first responder (law enforcement, fire, rescue, and emergency medical services (EMS) personnel) are increasingly likely to encounter fentanyl[†] in your daily activities (e.g., responding to overdose calls, conducting traffic stops, arrests, and searches).
- This document provides scientific, evidence-based recommendations to protect yourself from exposure.

WHAT YOU NEED TO KNOW

- Fentanyl[†] can be present in a variety of forms (e.g., powder, tablets, capsules, solutions, and rocks).
- Inhalation of airborne powder is MOST LIKELY to lead to harmful effects, but is less likely to occur than skin contact.
- Incidental skin contact may occur during daily activities but is not expected to lead to harmful effects if the contaminated skin is promptly washed off with water.
- Personal Protective Equipment (PPE) is effective in protecting you from exposure.
- Slow breathing or no breathing, drowsiness or unresponsiveness, and constricted or pinpoint pupils are the specific signs consistent with fentanyl[†] intoxication.
- Naloxone is an effective medication that rapidly reverses the effects of fentanyl[†].

[Special Edition - Opioid Bills](#)

Please find pending legislation regarding the opioid crisis. This is NOT an appropriation of funding and these bills are only the ones that have passed one body of the Congress as of June 22, 2018. The Congress intends to roll many of these bills into a single Opioid Bill that will move forward

These research reports have been submitted by the National Institute of Justice (NIJ) especially for their relevance to crime laboratory activities. ASCLD has not reviewed nor does it necessarily endorse the findings of this research.

Crime Lab Minute Sponsors

Since 1995, JusticeTrax has produced a suite of products geared specifically toward the law enforcement and forensic community. Over the years, our applications have gained increasing acceptance among city, county, state and federal law enforcement agencies. Our applications are designed by forensic scientists and are the most comprehensive case management tools available.

With installations ranging from small, single-site laboratories of five users, to extremely large multi-site installations with 500+ users, we are honored to serve some of the most sophisticated crime laboratories in North America, Australia, the Caribbean, and the Middle East. Of these 175+ laboratories, greater than 95% are accredited to the ISO/IEC 17025 International Standard.

JusticeTrax is an ISO 9001:2015 certified company.

Bode Cellmark Forensics provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode's newest offerings include: Sexual Assault Kit Backlog Reduction Program streamlines processes to eliminate backlogs of untested sexual assault kits.

Bode Buccal 2™ is uniquely designed to improve DNA databanking collecting and automate processing. The Bode Buccal 2 is a DIRECT COLLECTION SYSTEM that requires minimal training. There is NO Transfer Step Required.

Independent Validation Services are customized to meet your laboratory's needs. Validation services provide completely unbiased analysis on your equipment, chemistries, or process.
